America's (Math) Education Crisis Larry Zafran, 2010-10-19 America's education system is in a state of crisis A growing number of America's youth cannot read write or do math at all close to grade level In many cases these students and their families do not realize this or care The situation is compounded by the fact that American society no longer values education and does not understand how learning actually works Frequent reference is made to the illusion of learning in underperforming schools The book explains the difference between true learning and just being exposed to material It explains the essential role that parents play and that even with encouragement a child cannot be forced to learn The book is targeted at parents teachers administrators government officials and concerned citizens Older students may also benefit from reading it Despite its frankness about topics which are often disregarded and avoided there is nothing in the book that students don't intuitively understand In particular many students regularly experience the anonymity of being herded like cattle The goal of the book is to raise awareness and discuss whether we can fix the problem We cannot address our nation's education crisis until people understand its underlying causes and scope The book tells the truth in contrast to the misinformation provided by the government and the news media Suggested changes for improvement are made including those that can be implemented quickly and easily and those that require a great deal of money and coordination along with a fundamental change in how America handles education This book is controversial and covers issues that may anger upset or confuse some readers The book includes curse words to paint a vivid picture of the way many students speak and bluntly labels key aspects of our education system as bullsh t where applicable **North Carolina READY EOG Grade 6 Science** American Book Company, 2019 **Children's Books in Print, 2007** ,2006 Cumulated Index Medicus ,1979 *Journal of Education* ,1893 **ERS Spectrum** ,2003 Normal Instructor ,1906 *21st Century Challenges for School*
