Event-Cities 4 Bernard Tschumi, Lawrence Hunter, 2010-09-03 Lausanne EPFL Extension 1993 solids and Voids Reversal p 487 499 Event-Cities 5 Bernard Tschumi, 2024-11-12 An essential resource on the work of Bernard Tschumi Architects

with a focus on how concept context and program intersect with intuition in singular and unexpected ways Event Cities 5 is the fifth and final volume in the MIT Press series documenting recent built and unbuilt projects by renowned architect Bernard Tschumi This volume expands on the theoretical preoccupations that have shaped Tschumi's work in practice and pedagogy In this volume Tschumi embarks on what he calls a poetics that addresses both the rational elaboration of work and the irrational eruption of inexplicable elements in architectural projects How do chance intuition and analogy among other elements intersect with the logical play of concept context and program to generate innovative and informed design Highlights of this volume include circular building projects works with suspended gardens and floating rectangular masses superposed structures created via surrealist tactics an immense educational research complex in France that hovers between building and urban design a museum in China made from intersecting conic shapes and a project for a cultural center in Italy that is structured as an investigation into courtyards and facades The book features nearly 30 projects developed over the last fifteen years and highlights Tschumi's longstanding interest not only in producing conceptual clarity but in questioning architecture itself **Mega-event Cities: Urban Legacies of Global Sports Events** Valerie Viehoff, Gavin

Poynter, 2016-03-02 Mega events represent an important moment in the life of a city providing a useful lens through which we may analyse their cultural social political and economic development In the wake of the International Olympic Committee's IOC's concerns about gigantism and wider public concerns about rising costs it was imperative in the C21st to demonstrate the long term benefits that arose for the city and nations from hosting premier sporting events London 2012 was the first to integrate the concept of legacy from the moment a bid to host the Olympic and Paralympic Games was being considered London proposed an ambitious programme of urban renewal for East London Subsequent host city bids have adopted the legacy narrative and as this book demonstrates aligned this to major schemes of urban development and renewal Bringing together scholars practitioners and policy makers this book focuses upon the legacies sought by cities that host major sports events It analyses how governments the IOC and others define and measure legacy It also focuses upon the challenges and opportunities facing future host cities of mega events looking at their aspirations and the intended impact upon their domestic and international development It questions what the global shift in geographical location of mega events means for sports development and the business of sport what the attractions are for cities seeking to harness the hosting of a mega event and whether there may be longer term consequences for the bidding and hosting major sporting events in the wake of the widespread social unrest that accompanied the preparations in Brazil for hosting the FIFA World Cup 2014 and the summer Olympics 2016 and in Turkey where there was significant opposition to bid for the 2020 summer Olympiad

Event-Cities 3 Bernard Tschumi, 2005-04-01 How concept context and content interact in architecture provocative examples from recent projects by Bernard Tschumi In Event Cities 3 Bernard Tschumi explores the complex and productive triangulation of architectural concept context and content There is no architecture without a concept an overriding idea that gives coherence and identity to a building But there is also no architecture without context historical geographical cultural or content what happens inside Concept context and content may be in unison or purposely discordant Against the contextualist movement of the 1980s and 1990s which called for architecture to blend in with its surroundings Tschumi argues that buildings may or may not conform to their settings but that the decision should always be strategic Through documentation of recent projects including the new Acropolis Museum in Athens a campus athletic center in Cincinnati museums in Sao Paulo New York and Antwerp concert halls in France and a speculative urban project in Beijing Tschumi examines different ways that concept context and content relate to each other in his work In the new Acropolis Museum for example Tschumi looks at the interaction of the concept a simple and precise museum with the clarity of ancient Greek buildings with the context its location at the base of the Acropolis 800 feet from the Parthenon and the content which incorporates archaeological excavations on the building site into the fabric of the museum Through provocative examples Tschumi demonstrates that the relationship of concept context and content may be one of indifference reciprocity or conflict all of which he argues are valid architectural approaches Above all he suggests that the activity of architecture is less about the making of forms than the investigation and materialization of concepts *A Tale of Two Cities* Charles Dickens, 1922
