relationship of a contractual kind with accordant rights and obligations But what if for a moment we turned our attention to the empirical evidence of media consumption practice not just in Asia Africa and South America but also all over Europe and North America All over the world we are witnessing a growing number of people building media relationships outside those institutionalized sets of rules We do not intend to discuss whether we are dealing with legal or illegal practices our launching point for this analysis is that when a very significant proportion of the population is building its mediation through alternative channels of obtaining content such behavior should be studied in order to deepen our knowledge of media cultures Because we need a title to characterize those cultures in all their diversity but at the same time in their commonplaceness we propose to call it Piracy Cultures

*The Brand Bubble* John Gerzema, Edward LeBar, 2008-11-03 How to use brands to gain and sustain competitive advantage Companies today face a dilemma in marketing The tried and true formulas to create sales and market share behind brands are becoming irrelevant and losing traction with consumers In this book Gerzema and LeBar offer credible evidence drawn from a decade's worth of brand and financial data using Y R's Brand Asset Valuator BAV the largest database of brands in the world that business is riding on yet another bubble that is ready to burst a brand bubble While most managers still see metrics like trust and awareness as the backbone of how brands are built Gerzema asserts they're dead wrong these metrics do not add to increased asset value In fact by following them they actually hasten the declining value of their brands Using a five stage model The Brand Bubble reveals how today's successful brands and tomorrow's have an insatiable appetite for creativity and change These brands offer consumers a palpable sense of movement and direction thanks to a powerful energized differentiation Gerzema reveals how brands with energized differentiation achieve better financial performance than traditional brands have Plus Gerzema helps readers develop energized differentiation in their own brands creating consumer centric and sustainable organizations

**eGods** William Sims Bainbridge, 2013-04-01 What is the relationship between religion and multi player online roleplaying games Are such games simply a secular distraction from traditional religious practices or do they in fact offer a different route to the sacred In eGods a leading scholar in the study of virtual gameworlds takes an in depth look at the fantasy religions of 41 games and arrives at some surprising conclusions William Sims Bainbridge investigates all aspects of the gameworlds religious dimensions the focus on sacred spaces the prevalence of magic the fostering of a tribal morality by both religion and rules programmed into the game the rise of cults and belief systems within the gameworlds and how this relates to cults in the real world the predominance of polytheism and of course how gameworld religions depict death As avatars are multiple and immortal death is merely a minor setback in most games Nevertheless much of the action in some gameworlds centers on the issue of mortality and the problematic nature of resurrection Examining EverQuest II Lord of the Rings Online Rift World of Warcraft Star Wars The

Old Republic and many others Bainbridge contends that gameworlds offer a new perspective on the human quest one that combines the arts simulates many aspects of real life and provides meaningful narratives about achieving goals by overcoming obstacles Indeed Bainbridge suggests that such games take us back to those ancient nights around the fire when shadows flickered and it was easy to imagine the monsters conjured by the storyteller lurking in the forest Arguing that gameworlds reintroduce a curvilinear model of early religion where today as in ancient times faith is inseparable from fantasy eGods shows how the newest secular technology returns us to the very origins of religion so that we might arrive where we started and know the place for the first time *Group Processes* Andrew Pilny, Marshall Scott Poole, 2017-03-07 This volume introduces a series of different data driven computational methods for analyzing group processes through didactic and tutorial based examples Group processes are of central importance to many sectors of society including government the military health care and corporations Computational methods are better suited to handle potentially huge group process data than traditional methodologies because of their more flexible assumptions and capability to handle real time trace data Indeed the use of methods under the name of computational social science have exploded over the years However attention has been focused on original research rather than pedagogy leaving those interested in obtaining computational skills lacking a much needed resource Although the methods here can be applied to wider areas of social science they are specifically tailored to group process research A number of data driven methods adapted to group process research are demonstrated in this current volume These include text mining relational event modeling social simulation machine learning social sequence analysis and response surface analysis In order to take advantage of these new opportunities this book provides clear examples e g providing code of group processes in various contexts setting guidelines and best practices for future work to build upon This volume will be of great benefit to those willing to learn computational methods These include academics like graduate students and faculty multidisciplinary professionals and researchers working on organization and management science and consultants for various types of organizations and groups *Neutrons in Soft Matter* Toyoko Imae, Toshiji Kanaya, Michihiro Furusaka, Naoya Torikai, 2011-05-03 Neutron and synchrotron facilities which are beyond the scale of the laboratory and supported on a national level in countries throughout the world These tools for probing micro and nano structure research and on fast dynamics research of atomic location in materials have been key in the development of new polymer based materials Different from several existing professional books on neutron science this book focuses on theory instrumentation and applications The book is divided into five parts Part 1 describes the underlying theory of neutron scattering Part 2 describes the various instruments that exist and the various techniques used to achieve neutron scattering or bombardment Part 3 discusses data treatment and simulation methods as well as how to assess the environment of the sample temperature pressure shear and external fields Part 4 addresses the myriad applications of small and large molecules biomolecules and gels Part 5 describes the various global neutron sources that exist and provides an

overview of the different reactors      **Extending Virtual Worlds** Ann Latham Cudworth, 2018-09-03 Written as the successor to *Virtual World Design Creating Immersive Virtual Environments* this book carries the ideas brought forward in its predecessor to new levels of virtual world design exploration and experimentation Written by an Emmy award winning designer with 22 years of experience creating virtual environments for television and online communities *Extending Virtual Worlds Advanced Design for Virtual Environments* explores advanced topics such as multi regional design game based sims and narrative structure for environments The book provides bedrock knowledge and practical examples of how to leverage design concepts within the intertwined structures of physics engines level of detail LOD systems and advanced material editors It also shows designers new ways to influence the experience of virtual world visitors through immersive narrative and storytelling With over 150 illustrations and 10 step by step projects that include the necessary 3D models and modular components it delivers hours of stimulating creative challenges for people working in public virtual worlds or on private grids By using this book novices and advanced users will deepen their understanding of game design and how it can be applied to creating game based virtual environments It also serves as a foundational text for class work in distance learning simulation and other learning technologies that use virtual environments      *The Game Production Handbook* Heather Maxwell Chandler, 2009 This handbook focuses on the major production issues of game development including managing tasks and schedules organizing and motivating a team creating an efficient art program and engineering the design production pipeline This second edition also includes interviews with industry experts      **EverQuest II Role-playing Game** , 2004 Fantasirollespil
