

A serene sunset over the ocean. The sky is a warm, golden-orange color, transitioning into a darker blue as it meets the horizon. The ocean is calm, with gentle waves visible. In the foreground, dark, silhouetted rocks or a shoreline are visible, with waves crashing against them, creating white foam. The overall mood is peaceful and contemplative.

Latin Embedded Clauses Lieven Jozef Maria Danckaert, 2012 This monograph is one of the first studies that approaches Latin syntax from a formal perspective combining detailed corpus based description with formal theoretical analysis The empirical focus is word order in embedded clauses with special attention to clauses in which one or more constituents surface to the left of a subordinating conjunction It is proposed that two such types of left peripheral fronting should be distinguished The proposed analyses shed light not only on the clausal left periphery but also on the overall structure of the Latin clause The study is couched in the framework of generative grammar but since a thorough introduction is provided no special background in formal syntax is required Major topics touched upon are word order information structure locality and the syntax of pied piping The book covers both synchronic and diachronic topics of Latin syntax and is of interest for classical philologists historical linguists and formal syntacticians
