*Service-learning in the Curriculum* , 1996     Faculty Guide Peter Lenn, 2018-10-19 Your students deans and you will love your College Success course if you achieve these measurable outcomes More of your students graduate You get outstanding student evaluations You spend fewer and happier hours preparing and delivering the course After several years teaching undergraduate graduate and community college courses and then developing courses that hundreds of faculty have used successfully with about 1 million young adults I have found that many students don't think they can do better in school and they don't know how The challenge in Student Success Courses is to change their mindset get them to do deliberate practice and persevere to mastery We have found it effective to focus on the student sitting in a dorm room library or coffee shop studying The student has attended the lecture read the textbook and is now going to do something or some things to learn the material The keys to college success are to make good choices of what to do and to persevere to mastery This is a step by step guide to delivering a one semester or one quarter student success course using the Power Learners Handbook for College Success as the textbook With this approach hundreds of faculty members have helped thousands of students improve their academic performance In surveys one and two semesters after the course over 90% report improvements in 3 or more of 10 outcomes including grades organization concentration confidence and motivation The student Handbook provides the instruction and exercises This Faculty Guide describes how to prepare and conduct the course in a Learning Lab format This

competency based or mastery learning format is especially powerful for those students least prepared for the academic demands of college Learning Lab classes simulate students studying in the library At any given moment being at different points in the Handbook some are reading while others are writing essays memorizing drilling with flashcards or solving math problems A few students are working and talking quietly in pairs or threes On request the professor helps spending a minute or two or more with one student before going to the next Course Materials Resource Guide ,2002 **Academic**
