Fake Nano User Manual:

Micro/Nano Manufacturing André Zimmermann, Stefan Dimov, 2019-09-03 Micro manufacturing involves dealing with the fabrication of structures in the size range of 0.1 to 1000 nm. The scope of nano manufacturing extends the size range of manufactured features to even smaller length scales below 100 nm. A strict borderline between micro and nano manufacturing can hardly be drawn such that both domains are treated as complementary and mutually beneficial within a closely interconnected scientific community. Both micro and nano manufacturing can be considered as important enablers for high end products. This Special Issue of Applied Sciences is dedicated to recent advances in research and development within the field of micro and nano manufacturing. The included papers report recent findings and advances in manufacturing technologies for producing products with micro and nano scale features and structures as well as applications underpinned by the advances in these technologies.

Social Media Influencers in Strategic Communication Nils S. Borchers, 2021-12-21 This book seeks to draw a comprehensive picture of influencer collaborations from a strategic communication perspective. The contributors tackle strategic influencer communication from multidisciplinary perspectives from varying actor foci and from different methodological frameworks and methods. Influencers cross traditional boundaries in many ways and oscillate between intimacy and publicity, authenticity and commercialization, ingratiation and critical distance. From a strategic communication perspective, this variability makes influencers hard to capture. Organizations can cooperate with influencers to achieve both marketing and PR objectives. Influencers can act as cooperation partners integrating commercial content into organic narratives or as independent critics. Influencers also combine different roles that have traditionally been occupied by separate actors such as intermediary, content distributor, creative content producer, community manager, testimonial, strategic counsellor, and event host. The combination of these roles in just one actor opens new opportunities for strategic communication and can produce appreciated synergy effects. It is therefore hardly surprising that influencer collaborations have become a firmly established instrument in the toolbox of strategic communicators. The chapters in this book were originally published in the *International Journal of Advertising* and the *International Journal of Strategic Communication*.
