López,2021-11-23 A rich narrative exploration of the ways love defies survives thrives and dies as lovers contend with US immigration policy For mixed citizenship couples getting married is the easy part The US Supreme Court has confirmed the universal civil right to marry guaranteeing every couple s ability to wed But the Supreme Court has denied that this right to marriage includes married couples right to life liberty and the pursuit of happiness on US soil creating a challenge for mixed citizenship couples whose individual level rights do not translate to family level protections While US citizens can extend legal inclusion to their spouses through family reunification they must prove their worthiness and the worthiness of their love before their relationship will be officially recognized by the state In Unauthorized Love Jane L pez offers a comprehensive critical look at US family reunification law and its consequences as experienced by 56 mixed citizenship American couples These couples stories of integration and alienation of opportunity and inequality of hope and despair make tangible the consequences of current US immigration laws that tend to favor Whiteness wealth and heteronormativity as well as the individual rather than the family unit in awarding membership and official belonging In examining the experiences of couples struggling to negotiate intimacy under the constraints of immigration policy L pez argues for a rethinking of citizenship as a family affair

Human Enhancement Technologies and Our Merger with Machines Woodrow Barfield, Sayoko Blodgett-Ford, 2021-06-15 A cross disciplinary approach is offered to consider the challenge of emerging technologies designed to enhance human bodies and minds. Perspectives from philosophy, ethics, law, and policy are applied to a wide variety of enhancements, including integration of technology within human bodies as well as genetic, biological, and pharmacological modifications. Humans may be permanently or temporarily enhanced with artificial parts by manipulating or reprogramming human DNA and through other enhancement techniques and combinations thereof. We are on the cusp of significantly modifying and perhaps improving the human ecosystem. This evolution necessitates a continuing effort to re-evaluate current laws and, if appropriate, to modify such laws or develop new laws that address enhancement technology. A legal, ethical, and policy response to current and future human enhancements should strive to protect the rights of all involved and to recognize the responsibilities of humans to other conscious and living beings regardless of what they look like or what abilities they have or lack. A potential ethical approach is outlined in which rights and responsibilities should be respected even if enhanced humans are perceived by non-enhanced or less-enhanced humans as no longer human at all.
