1993 Handbook on Women Workers, 1994 **Women's Employment in Europe** Colette Fagan, Jill Rubery, Mark Smith, 1999-08-05 Based on extensive original research this volume examines contemporary patterns of womens employment in Europe in the context of the profound economic social and cultural changes that have taken place in recent years It considers the progress made towards equal treatment in the labour market in the light of European Union action programmes and **Women and Work** Paul Phillips, Erin Phillips, 2000 Women and Work provides an analysis of the issue of workplace inequality Among the topics discussed are women s participation in the workplace the continuing disparity in wages the impact of new technologies free trade and economic restructuring and the involvement of women in the labour movement This revised edition amplifies the authors findings that little has improved in women s working conditions and prospects **The Women's Movement and Women's Employment in Nineteenth Century Britain** Ellen Jordan, 2002-01-04 In the first half of the nineteenth century the main employments open to young women in Britain were in teaching dressmaking textile manufacture and domestic service After 1850 however young women began to enter previously all male areas like medicine pharmacy librarianship the civil service clerical work and hairdressing or areas previously restricted to older women like nursing retail work and primary school teaching This book examines the reasons for this change The author argues that the way femininity was defined in the first half of the century blinded employers in the new industries to the suitability of young female labour This definition of femininity was however contested by certain women who argued that it not only denied women the full use of their talents but placed many of them in situations of economic insecurity This was a particular concern of the Womens Movement in its early decades and their first response was a redefinition of feminity and the promotion of academic education for girls The author demonstrates that as a result of these efforts employers in the areas targeted began to see the advantages of employing young women and young women were persuaded that working outside the home would not endanger their femininity *Puerto Rican Women and Work* Altagracia Ortiz, 1996-10-03 Puerto Rican Women and Work Bridges in Transnational Labor is the only comprehensive study of the role of Puerto Rican women workers in the evolution of a transnational labor force in the twentieth century This book examines Puerto Rican women workers both in Puerto Rico and on the U S mainland It contains a range of information historical ethnographic and statistical The contributors provide insights into the effects of migration and unionization on women s work taking into account U S colonialism and globalization of capitalism throughout the century as well as the impact of Operation Bootstrap The essays are arranged in chronological order to reveal the evolutionary nature of women s work and the fluctuations in migration technology and the economy This one of a kind collection will be a valuable resource for those interested in women s studies ethnic studies and Puerto Rican and Latino studies as well as labor studies **Women and the World of Work** Anne Hoiberg, 2012-12-06 From August 4 to 8 1980 the Science Committee of the North Atlantic Treaty

Organization NATO sponsored the symposium Women and the World of Work which was held at the Hotel Sintra Estoril in the coastal area south of Lisbon Portugal This symposium had been in progress since 1977 when the idea to prepare a proposal for a NATO sponsored symposium on the topic of women and the military was first suggested by Dr Walter Wilkins then Scientific Director of the Naval Health Research Center San Diego California At that time and during the previous 5 years increasing numbers of women were being recruited into military service not only in the United States but also in several NATO allied countries Few research projects on the utilization of women in the military had been reported in the scientific literature with the exception of work conducted at the University of Chicago and Naval Health Research Center Several investigators however were identified who had recently initiated research in this area and who expressed interest in participating in the proposed symposium A few months after submitting the proposal Dr B A Bayraktar Director of the Scientific Affairs Division responded that the members of the Science Committee recommended the deletion of those segments of the tentative program which pertained to women and the military The reason given for this suggested change was that the topic chosen was similar to the theme of other recent international conferences

This Small Army of Women Linda J. Quiney, 2017-05-01 With her soft linen head scarf and white apron emblazoned with a red cross the Voluntary Aid Detachment nurse or VAD has become a romantic emblem of the First World War This Small Army of Women draws on diaries letters and interviews to tell the forgotten story of the nearly two thousand women from Canada and Newfoundland who volunteered to do their bit at home and overseas Middle class and well educated but largely untrained VADs were excluded from Canadian military hospitals overseas the realm of the professional nurse but helped solve Britain's nursing deficit and filled gaps in Canada's domestic nursing ranks Their dedication and struggle to secure a place at their brothers' bedsides reveals much about women's contributions to the war effort the tensions between amateur and professional nurses and women's evolving role outside the home

Women's Employment in a Comparative Perspective Liset Van Dijk, Tanja Van Der Lippe, These comparative studies by internationally known scholars in the United States Hungary Germany and the Netherlands provide a cross national examination of substantially differing circumstances in hours earnings job level childcare availability parental leave and the like of women's employment The book's dual focus on micro and macro approaches clarifies the extent to which these variances can be ascribed to differences in the institutional context of employment or to the individual characteristics of female employees It thereby provides a valuable contribution both to gender studies and to studies on the sociology of work Women's employment changed dramatically during the second half of the twentieth century Countries in the northern hemisphere have faced similar trends in labor and employment yet there are still many contrasts between them when it comes to women's work In this volume women's employment is studied in different institutional structural and social settings with the intention of exploring the causes of the differences and similarities in women's employment in different countries and at different times Three perspectives are used the macro

approach which provides a thorough and focused understanding of the influence of the institutional context on women's work the micro approach which gives insight into the employment behavior of individual women who live in the same social or institutional context and the macro micro approach which makes clear the relative importance to women's work of both individual characteristics and institutional context While a good deal of information is available on women's employment a cross national comparison over time has been lacking This book fills that all important niche Women's Employment in a Comparative Perspective thus has a special relevance for economists as well as sociologists and social work specialists Tanja Van der Lippe is assistant professor of sociology at the Research School ICS of Utrecht University the Netherlands Liset Van Dijk is senior researcher at the Netherlands Institute for Health Services Research Nivel

The Employment Relationship William P. Bridges, Wayne J. Villemez, 2007-08-27 In 1979 serious research was just beginning on the connections between stratification outcomes and organizations Data suitable for investigating these connections were scarce and the general wisdom was that they would remain scarce since organizational case studies were seen as the only means of gathering linked individual and organizational data The case study approach does allow one to link the two types of data but gathering such data on more than a few organizations is prohibitively expensive and difficult and having only a few organizations limits generalizability To help solve this problem we developed the idea of a survey of a random sample of several thousand employed individuals followed by a second survey of their several thousand employing organizations This method we reasoned would provide us with a generalizable simple random sample of individuals coupled with a weighted random sample of organizations weighted of course by size of organization An added benefit would be that these valuable data could be gathered by a survey organization for the price of two simple surveys It was not an easy idea to sell We developed it into a proposal to the National Science Foundation NSF and though the reviewers were otherwise sympathetic they were almost unanimous in their contention that such a survey would not work because obviously the great majority of respondents would refuse to reveal exactly who their employers were
