Practical Risk Management for EPC / Design-Build Projects Walter A. Salmon, 2020-02-25. Many of the books on construction risk management concentrate on theoretical approaches to the accurate assessment of the overall risks of taking on a new project. Less attention is paid to the typical risks to which the operational level of a project is exposed and how operational managers should approach those risks during project implementation. This book identifies precisely where the major EPC Design Build risks occur within an operational framework and shows how best to deal with those risks. The book attempts to offer practical advice, approaches and tools for dealing with risks to which the various operational departments are exposed.

The Comparative Law Yearbook of International Business Christian Campbell, 2020-03-23. Conflict avoidance and resolution have always been primary purposes of the law. Satisfaction with judicial processes has declined in many jurisdictions. After the diversion of many disputes from courts to arbitral tribunals, arbitration has now also become a target of intense criticism. This dissatisfaction with binding third party adjudication of disputes coincides with rising tensions among citizens asking basic questions about what they can expect from each other and their governments in a constantly changing world. One response has been the proliferation of processes between disputing parties that are structured and interactive, negotiation and assisted by a neutral third party using specialized negotiation and communication techniques. These processes have been labelled mediation. While mediation is not focused on the identification and application of legal rights and duties in the way that adjudication is, its success remains dependent on a legal framework which is still evolving in most

jurisdictions and especially across borders In this edition of the Comparative Law Yearbook of International Business lawyers from nine jurisdictions examine developments relating not only to the framework for cross border mediation such as the Singapore Convention or inter State disputes or relating to their countries overall approaches to regulating this method of dispute resolution but also relating to specific issues such as mediator ethics and conflicts of interest and even exploring the neural science of conflict dynamics
