Posthuman Lear Craig Dionne, 2016 Be sure to fasten your seatbelts while reading Craig Dionne's POSTHUMAN LEAR. In addition to being a wild ride through time and space hurtling from late antiquity to post Fukushima radiated Japan by way of Shakespeare's motley crew of castaways on a storm battered heath, the book also offers a reparative salve for our troubled anthropocene. As long as we speak what we feel and reversing Edgar's famous line even what we ought to say with the shards and broken fragments of borrowed proverbial speech, we will at least have shelter with each other and with a newly denuded world and in a consoling if partly ruined human language from the coming Winter.

Eileen Joy: Craig Dionne has written Shakespearean criticism as it should be written: theoretically sophisticated, historically situated, while tied to the present moment and thoroughly engaging. As a piece of writing, *Posthuman Lear* will change the way you think about *Lear* and about the work we do.

Sharon O Dair: Approaching *King Lear* from an eco-materialist perspective, *Posthuman Lear* examines how the shift in Shakespeare's tragedy from court to stormy heath activates a different sense of language as tool, being from that of participating in the flourish of aristocratic prodigality and circumstance to that of survival and pondering one's interdependence with a denuded world. Dionne frames the thematic arc of Shakespeare's tragedy about the fall of a king as a tableau of our post-sustainable condition. For Dionne, *Lear*'s progress on the heath works as a parable of flat ontology. At the center of Dionne's analysis of rhetoric and prodigality in the tragedy is the argument that adages and proverbs, working as embodied forms of speech, offer insight into a nonhuman fragmentary mode of consciousness. The Renaissance fascination with memory and proverbs provides an opportunity to reflect on the human as an instance of such enmeshed being where the habit of articulating memorized patterns of speech works on a somatic level. Dionne theorizes how mnemonic memory functions as a potentially empowering mode of consciousness inherited by our evolutionary history as a species, revealing how our minds work as imprinted machines to recall past prohibitions and useful affective scripts to aid in our interaction with the environment. The proverb is that linguistic inscription that defines the equivalent of human animal imprinting where the past is etched upon collective memory within adagential being that lives on through the generations as autonomic cues for survival. Dionne's reimagining of this tragedy is important in the way it places Shakespeare's central existential questions—the meaning of familial love, commitments to friends, our place in a secular world—in a new relation to the main question of surviving within fixed environmental limits. Along the way, Dionne reflects on the larger theoretical implications of recycling the old historicism of early modern culture to speak to an eco-materialism and why the modernist textual aesthetics of the self-distancing text seems inadequate when considering the uncertainty and trauma that underscores life in a post-sustainable culture. Dionne's final appeal is to repurpose our fatalism in the face of ecological

Cyberculture, Cyborgs and Science Fiction William S. Haney II, 2006-01-01 Addressing a key issue related to human nature this book argues that the first person experience of pure consciousness may soon be under

threat from posthuman biotechnology In exploiting the mind s capacity for instrumental behavior posthumanists seek to extend human experience by physically projecting the mind outward through the continuity of thought and the material world as through telepresence and other forms of prosthetic enhancements Posthumanism envisions a biology machine symbiosis that will promote this extension arguably at the expense of the natural tendency of the mind to move toward pure consciousness As each chapter of this book contends by forcibly overextending and thus jeopardizing the neurophysiology of consciousness the posthuman condition could in the long term undermine human nature defined as the effortless capacity for transcending the mind s conceptual content Presented here for the first time the essential argument of this book is more than a warning it gives a direction far better to practice patience and develop pure consciousness and evolve into a higher human being than to fall prey to the Faustian temptations of biotechnological power As argued throughout the book each person must choose for him or herself between the technological extension of physical experience through mind body and world on the one hand and the natural powers of human consciousness on the other as a means to realize their ultimate vision
