Assessments for Sport and Athletic Performance Fukuda, David H., 2019 Many scientific sport assessment resources are difficult to understand, can be time consuming to implement, and provide data that are difficult to analyze. Assessments for Sport and Athletic Performance effectively solves those problems in this practical, user-friendly guide to performance-based evaluation. A perfect resource for coaches and fitness professionals, Assessments for Sport and Athletic Performance is a streamlined guide through the process of identifying appropriate tests for individuals or teams, making use of common, low-cost equipment to administer the tests, interpreting data, adjusting training programs based on the results, and continually monitoring the training.

Campbell's Physiology Notes For Nurses John Campbell, 2006-02-22 This accessible and friendly text is based on the premise that all nurses need a working knowledge of the normal functioning of the human body. It is only when we understand the normal that the abnormal pathological situation makes sense. If we can understand how the body goes wrong, then it often becomes obvious what needs to be done to treat the disorder. So physiology and pathophysiology can both be used to inform our clinical interventions and provide us with rationales for care. In this concise
