Handbook of Research on Multidisciplinary Approaches to Literacy in the Digital Age Taskiran, Nurdan Oncel, 2019-11-29 The fast pace of technology in this day and age has made it difficult for individuals to stay informed without becoming lost in the folds of an information overload Methods used to narrow down information are becoming just as important as providing the information to be discovered The Handbook of Research on Multidisciplinary Approaches to Literacy in the Digital Age is a pivotal reference source that provides vital research on the significance of being literate in the age of speed and technology While highlighting topics such as e advertising mobile computing and visual culture this publication explores the major issues society has in the information age and the methods of innovative achievements of public or private institutions This book is ideally designed for researchers academicians teachers and business managers seeking current research on a variety of social sciences in terms of the digital age

The Oxford Handbook of Film and Media Studies Robert Kolker, 2008-09-11 This handbook examines film and new media in the light of their convergence It draws on leading scholars in the field to discuss traditional areas of history and theory of film and digital media Its focus however is on the cycle of technologically driven arts Film was born of a number of experiments in reproducing motion all of which culminated in the nineteenth century projection of short films The creation of digital media resulted from experiments in alternative forms of representation in the early 1960s John Whitney began creating avant garde films from digital graphics around 1960 and some of his ideas and methods were incorporated by Stanley Kubrick in 2001 A Space Odyssey By the early 1990s commercial filmmakers began to employ digital effects in their work By the late nineties digital arts had come fully into their own both in the form of stand alone or interactive artworks and films created with and

for the computer At the same time digital effects had completely overtaken optical printing and matte painting in film From special effects to creating realistic backgrounds and crowds the digital is infiltrating all aspects of filmmaking The infiltration is about to become a takeover as celluloid is replaced by high definition digital recording and projection processes Many aspects of film will change as this latest convergence takes place Already cultural response to film has changed as viewers begin to teach themselves about film through supplementary material on DVDs and to make their own films on home computers But this handbook is not a technical history or manual Quite the contrary it is a scholarly work discussing the aesthetics economics and cultural results of these changes and convergences The book balances traditional scholarship and analysis with essays addressing technological change and the concurrent changes in cultural responses to these changes responses already acknowledged by the profession
