*Engaging Students in Disciplinary Literacy, K-6* Cynthia H. Brock, Virginia J. Goatley, Taffy E. Raphael, Elisabeth Trost-Shahata, Catherine M. Weber, 2014. This accessible book will help elementary school teachers improve literacy instruction inside or outside the Common Core environment. The authors address teachers' instructional needs by introducing key concepts from current trends in literacy education, from high-level standards to the use of 21st-century literacies. Readers then follow teachers as they successfully implement the curriculum they developed to promote high-level thinking and engagement with disciplinary content. The text focuses on three disciplinary literacy units of instruction: a science unit in a 2nd-grade classroom, a social studies/history unit in a 4th-grade classroom, and a mathematics unit in a 6th-grade classroom. Each unit revolves around a central inquiry question and includes research-based strategies for using reading, writing, and classroom talk as tools to foster disciplinary understandings. This unique insider's look at how real teachers build and implement a Common Core-aligned curriculum will be an invaluable resource for teachers, schools, and districts as they move forward to align their own curricula. I can't imagine a more timely book: a set of elegant principles and some stunning examples of how teachers can use reading, writing, and talk to enhance learning in the science, social studies, and mathematics classroom.

P. David Pearson, professor of language and literacy and human development, Graduate School of Education, University of California, Berkeley. If you're wondering how to integrate literacy across the content disciplines, this is the text you will want to keep and return to often.

Diane Lapp, distinguished professor of education, San Diego State University. Inspiring and better still, infectious.

Donald R. Bear, Iowa State University. Provides concrete ideas for teaching students to use literacy to think like scientists, historians, and mathematicians.

Douglas Fisher, professor of educational leadership, San Diego State University, and teacher leader, Health Sciences High and Middle College.

**Ivan Pavlov** Daniel P. Todes, 2014-10-15. Winner of the Pfizer Award from the History of Science Society. Contrary to legend, Ivan Pavlov (1849-1936) never trained a dog to salivate to the sound of a bell. So begins this definitive, deeply researched biography of Ivan Pavlov. Daniel P. Todes fundamentally reinterprets the Russian physiologist's famous research on conditional reflexes and weaves his life values and

science into the tumultuous century of Russian history particularly that of its intelligentsia from the reign of tsar Nicholas I to Stalin's time Ivan Pavlov was born to a family of priests in provincial Riazan before the serfs were emancipated and made his home and professional success in the booming capital of St Petersburg in late imperial Russia He suffered the cataclysmic destruction of his world during the Bolshevik seizure of power and civil war of 1917-21 rebuilt his life in his seventies as a prosperous dissident during the Leninist 1920s and flourished professionally as never before in the 1930s industrialization revolution and terror of Stalin times Using a wide variety of previously unavailable archival materials Todes tells a vivid story of that life and redefines Pavlov's legacy Pavlov was not in fact a behaviorist who believed that psychology should address only external behaviors rather he sought to explain the emotional and intellectual life of animals and humans the torments of our consciousness This iconic objectivist was actually a profoundly anthropomorphic thinker whose science was suffused with his own experiences values and subjective interpretations Todes's story of this powerful personality and extraordinary man is based upon interviews with surviving coworkers and family members along with never before analyzed taped interviews from the 1960s and 1970s examination of hundreds of scientific works by Pavlov and his coworkers and close analysis of materials from some twenty-five archives The materials range from the records of his student years at Riazan Seminary to the transcripts of the Communist Party cells in his labs and from his scientific manuscripts and notebooks to his political speeches they include revealing love letters to his future wife and correspondence with hundreds of scholars artists and Communist Party leaders and memoirs by many coworkers his daughter his wife and his lover The product of more than twenty years of research this is the first scholarly biography of the physiologist to be published in any language
