Geology and Politics in Frontier Texas, 1845-1909 Walter Keene Ferguson, 2014-11-07 Conservation and development of natural resources

are issues of critical importance throughout the world These issues have been matters of public concern in Texas since legislators first adopted the state sponsored geological survey as a means of extending government funds to private citizens who would help develop and advertise the mineral and agricultural wealth of Texas Walter Keene Ferguson examines the relation of politics to geological exploration during a critical period in Texas history the first half century of statehood Although Texas shared its frontier experience with many other areas it could not rely on federal aid in the form of land grants

because the state government controlled the destiny of the public domain at all times Acrimonious debate between farmers and urbanites of East Texas and pioneer ranchers of arid West Texas rendered the disposition of public lands even more difficult As tools for developing and advertising resources the geological and agricultural surveys of 1858 and 1867 fulfilled the demands of expectant capitalism made by politicians speculators and railroad entrepreneurs Reconnaissance geologists publicized the wealth of Texas Drought in 1886 and popular agitation against squandering of state land caused the emergence of a new concept of the geological survey as an instrument of land reform and public assistance Lobbying by reformers and scientific organizations led to the formation of the Dumble Survey in 1888 and the University of Texas Mineral Survey in 1901 Stratigraphic analysis of the individualities of Texas geology helped the state realize its full economic potential and led to legislation to protect public mineral land from exploitation The youthful oil industry finally removed geological exploration from the political arena As part of the University a permanent Bureau of Economic Geology was established in 1909 to extend the benefits of scientific research to private citizens and state organizations on a nonpartisan basis Ferguson s analysis of geological surveys in Texas contributes to an understanding not only of the geology and history of the state but of the urgent problem of evaluating the natural resources of underdeveloped regions **The Wiley**

Magicians and Brothers Michael Gaski,2014-11-24 It is September 1973 Brilliant young philosopher Phillip Kinsella fleeing the political unrest of Chicago s anti war protests and the social turbulence of racial demonstrations arrives at the Sorbonne in Paris to begin what he believes to be a two year postgraduate assignment His intellectual pursuits however are soon disrupted by his new friends in his Latin Quarter neighborhood and as their mysteries are revealed love jealousy and even Phillip s secrets unravel in violence Ultimately cast adrift in Paris a disillusioned Phillip is offered a research opportunity by an aging scientist Professor Cortez But the tranquility of this Navajo professor s summer institute in New Mexico evaporates quickly as a m lrange of science heroism and superstition intertwine Inevitably drawn with Professor Cortez and his twin brother Victor into a vortex of violence in the dangerous mountain elevations of South America and an occluded realm where betrayal is exposed Phillip is pushed to the limits of his faith Now he must choose between his convictions and the Cortez brothers myth to save their lives and his own In this tale of adventure the world of academic idealism collides with the human quest for earthly treasure as a philosopher s beliefs are tested in ways he never could have imagined Reimagining Nigeria's Educational System Joseph A. Balogun,2023-09-20 This book assesses the challenges within the Nigerian educational system and provides a concrete plan to revitalize the low performing system by strengthening high stakes testing at all levels In Nigeria many citizens believe that the solution to the country s low performance in education is to eliminate high stakes standardized testing High stakes testing refers to applying standardized

student achievement tests as a primary mechanism to evaluate students teachers and their school s performance This book argues that the poor quality of education and low ranking of Nigeria s educational system is not related to the negative consequences of high stakes testing but rather is due to many intrinsic factors By conducting a comparative analysis of six high performing education systems worldwide the book offers a comparative summative evaluation of the educational system and offers recommendations This book will be of interest to policymakers and scholars in the fields of African education higher education quality and global studies African studies management and administration leadership and professional development studies Joseph Abiodun Balogun is former Dean and retired Distinguished University Professor at the College of Health Sciences Chicago State University USA Visiting Professor Program Consultant at the Centre of Excellence in Reproductive Health Innovation University of Benin Nigeria and President CEO Joseph Rehabilitation Center Tinley Park Illinois USA
