Data Integration in the Life Sciences Helena Galhardas, Erhard Rahm, 2014-07-05 This book constitutes the refereed proceedings of the 10th International Conference on Data Integration in the Life Sciences DILS 2014 held in Lisbon Portugal in July 2014 The 9 revised full papers and the 5 short papers included in this volume were carefully reviewed and selected from 20 submissions The papers cover a range of important topics such as data integration platforms and applications biodiversity data management ontologies and visualization linked data and query processing *Biological Identity* Anne Sophie Meincke, John Dupré, 2020-08-25 Analytic metaphysics has recently discovered biology as a means of grounding metaphysical theories This has resulted in long standing metaphysical puzzles such as the problems of personal identity and material constitution being increasingly addressed by appeal to a biological understanding of identity This development within metaphysics is in significant tension with the growing tendency amongst philosophers of biology to regard biological identity as a deep puzzle in its own right especially following recent advances in our understanding of symbiosis the evolution of multi cellular organisms and the inherently dynamical character of living systems Moreover and building on these biological insights the broadly substance ontological framework of metaphysical theories of biological identity appears problematic to a growing number of philosophers of biology who invoke process ontology instead This volume addresses this tension exploring to what extent it can be dissolved For this purpose the volume presents the first selection of essays exclusively focused on biological identity and written by experts in metaphysics the philosophy of biology and biology The resulting cross disciplinary dialogue paves the way for a convincing account of biological identity that is both metaphysically constructive and scientifically informed and will be of interest to metaphysicians philosophers of biology and theoretical biologists

Data and Text Processing for Health and Life Sciences Francisco M. Couto, 2019-06-10 This open access book is a step by step introduction on how shell scripting can help solve many of the data processing tasks that Health and Life specialists face everyday with minimal software dependencies The examples presented in the book show how simple command line tools can be used and combined to retrieve data and text from web resources to filter and mine literature and to explore the semantics encoded in biomedical ontologies To store data this book relies on open standard text file formats such as TSV CSV XML and OWL that can be open by any text editor or spreadsheet application The first two chapters Introduction and Resources provide a brief introduction to the shell scripting and describe popular data resources in Health and Life Sciences The third chapter Data Retrieval starts by introducing a common data processing task that involves multiple data resources Then this chapter explains how to automate each step of that task by introducing the required commands line tools one by one The fourth chapter Text Processing shows how to filter and analyze text by using simple string matching techniques and regular expressions The last chapter Semantic Processing shows how XPath queries and shell scripting is able to process complex data such as the graphs used to specify ontologies Besides being almost immutable

for more than four decades and being available in most of our personal computers shell scripting is relatively easy to learn by Health and Life specialists as a sequence of independent commands Comprehending them is like conducting a new laboratory protocol by testing and understanding its procedural steps and variables and combining their intermediate results Thus this book is particularly relevant to Health and Life specialists or students that want to easily learn how to process data and text and which in return may facilitate and inspire them to acquire deeper bioinformatics skills in the future

Technologies in Biomedical and Life Sciences Education Harry J. Witchel, Michael W. Lee, 2022-06-24 This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content including media as a learning supplement in comparison to traditional face to face learning Each chapter includes research on and a broad brush summary of approaches to combining life sciences education with

educational technologies The chapters are organized into four main sections each of which focuses on a key question regarding the consequences of incorporating media into education In this regard the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity Further they address the ongoing discussion as to whether students need to be present for lectures and on how having agency in their own learning can improve both retention and conceptual understanding To link the content to current events the authors also shed light on the impact that the COVID 19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies Consequently the book offers life science educators valuable guidance on the technologies already available and an outlook on what is yet to come

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives
