criticism of competing theories British cultural studies New Historicism cultural materialism he shows how this new study should and should not be done Easthope's exploration of the problems possibilities and politics of this new discipline includes an original reassessment of the question of literary value By contrasting Conrad's Heart of Darkness with Burroughs Tarzan of the Apes Easthope demonstrates how textuality sustains the opposition between high and popular culture darkness

Textual Practice Terence Hawkes,2005-08-03 Textual Practice has established itself as Britain's leading journal of radical literary theory **Mindful Aesthetics** Chris Danta,Helen Groth,2013-11-07 In the last few decades literary critics have increasingly drawn insights from cognitive neuroscience to deepen and clarify our understanding of literary representations of mind This cognitive turn has been equally generative and contentious While cognitive literary studies has reinforced how central the concept of mind is to aesthetic practice from the classical period to the present critics have questioned its literalism and selective borrowing of scientific authority Mindful Aesthetics presents both these perspectives as part of a broader consideration of the ongoing and vital importance of shifting concepts of mind to both literary and critical practice This collection contributes to the forging of a new interdisciplinarity to paraphrase Alan Richardson's recent preface to the Neural Sublime that is more concerned with addressing how rather than why we should navigate the

increasingly narrow gap between the humanities and the sciences **The Mother's Day Protest and Other Fictocritical Essays** Stephen Muecke,2016-06-20 As a genre that confounds the distinction between fiction and non fiction fictocriticism continues to gain currency It solves a problem for researchers and writers who do not wish to be held to that somewhat artificial division and who consider their research methods necessarily to include the stylistic experiments that show their research and thought processes Research knowledge of the world that continues to be written up after the fact in the usual academic genres has a tendency to re-inscribe the status quo The world stays the way it is change surprise and experiment elude the writer Stephen Muecke one of the originators of fictocritical writing presents a selection of his best essays in this innovative genre In doing so he offers a rare and important theorization of the potential of speculative methods across disciplines including Literary Studies Philosophy Anthropology Geography and Science and Technology Studies **Fantasy**
