**Effects of Globalization on Education Systems and Development** Macleans A. Geo-JaJa, Suzanne Majhanovich, 2016-11-04 With its comprehensive coverage and quality this provocative book is concerned with the future of developing countries in Africa Asia and Latin America By providing in depth analysis of the economic social and educational challenges of emerging states it offers an alternative roadmap to development The authors in this collection substantiate the notion that emerging states often do not participate in policy choices related to their development when faced with universalization of curriculum and internationalization of education The authors make explicit the direct and indirect effects of globalization on educational systems social equity and the path of development In demonstrating the impact of neoliberalism or market based reforms on the developing world the authors show that education without human rights is vulnerable to negative forces of globalization and internationalization The message of the book is quite pessimistic about possibilities to widen the economic space or increase freedom unless development cooperation is made possible by Helping People Help Themselves as suggested by David Ellerman The authors note that in the past the issue of emerging states as an

appendage to the world economy was a fundamental question related to colonialism but now has become a question of imperialism which needs to be examined when considering the current patterns of development      Decoloniality, Language and Literacy Carolyn McKinney, Pam Christie, 2021-12-20 Through a range of unconventional genres representations of data and dialogic reflective narratives alongside more traditional academic genres this book engages with contexts of decoloniality and border thinking in the Global South It addresses processes of knowledge production and participation in the highly divided and unequal schooling and higher education system in South Africa and highlights the consequences of the monolingual myth in post colonial education demonstrating opportunities for learning provided by translanguaging It explores both embodied multimodal and multilingual instances of knowledge making in teaching and teacher education that take place outside but alongside formal classroom lecture and seminar modes and the positionality and learning experiences of teacher educators in science literacy and language across the curriculum The book is not only transdisciplinary but also captures the learning that takes place beyond the borders of disciplines and formal classroom spaces      *(u)Mzantsi Classics* Samantha Masters, Imkhitha Nzungu, Grant Parker, 2022-10-15 An Open Access edition of this book will be available on publication on the Liverpool University Press and African Minds websites Though Greco Roman antiquity classics has often been considered the handmaid of colonialism its various forms have nonetheless endured through many of the continent s decolonising transitions Southern Africa is no exception This book canvasses the variety of forms classics has taken in Zimbabwe Mozambique and especially South Africa and even the dynamics of transformation itself How does u Mzantsi classics of southern Africa look in an era of profound change whether violent or otherwise What are its future prospects Contributors focus on pedagogies historical consciousness the creative arts and popular culture The volume in its overall shape responds to the idea of dialogue in both the Greek form associated with Plato s rendition of Socrates wisdom and in the African concept of ubuntu Here are dialogues between scholars both emerging and established as well as students some of whom were directly impacted by the Fallist protests of the late 20 teens Rather than offering an apologia for classics these dialogues engage with pressing questions of relevance identity change the canon and the dynamics of decolonisation and potential recolonisation The goal is to interrogate classics the ways it has been taught studied perceived transformed and even lived from many points of view      **Anchored in Place** Bank, Leslie, Cloete, Nico, 2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It

acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges

**Ethnoveterinary Medicine** Lyndy J. McGaw, Muna Ali Abdalla, 2019-12-31 The importance of a complementary approach to animal health is highlighted in this book with core themes encompassing reviews of traditional veterinary medicine for common diseases afflicting livestock as well as local practices in different areas of the world The book includes chapters on ethnoveterinary medicine used to prevent and treat ticks and tick borne diseases infectious diseases and parasites Ethnoveterinary practices in parts of the world which have not been comprehensively reviewed before are highlighted including Estonia Belarus and the Maghreb the north western tip of Africa A fascinating account of African ethnoveterinary medicine and traditional husbandry practices is provided by a veteran in the field with a wealth of practical experience in the area Neglected areas of research involve the relationship of ethnoveterinary medicine with environmental ethical cultural and gender aspects and leading experts explore these issues The book is intended to provide an informative compilation of current research and future prospects in ethnoveterinary medicine which hopes to inform and encourage investigations in new directions Sustainable development requires a concerted effort to combine indigenous knowledge systems with scientific research to improve animal health This is the case not only in rural areas where access to orthodox veterinary health care may be limited but also against the backdrop of antibiotic resistance and increased demand for alternative and complementary therapies to enhance the health of both production and companion animals Students academics and veterinary professionals will find this book a useful addition to knowledge on present and future aspects of ethnoveterinary research
