While the title of this opening chapter may appear to be a little self-serving and owes its origins to Robert Strausz-Hupe, the founder of the right-wing Foreign Policy Research Institute in the United States, I aim to convince you that it is not only smart but also essential to be geopolitical. Amid the ongoing bloodshed in Afghanistan, Iraq, Sudan, and less well reported places such as the Congo, the continued relevance of geopolitics is overwhelming. Despite the claims made in favour of ever more intense forms of globalization, the relevance of territory, international boundaries, and claims to sovereignty remain as pressing as ever. A few feet here or there can mean the matter of life and/or death. The labelling of a particular place as 'dangerous' and/or 'threatening' can invite military assaults from land, sea, and air, as civilians found to their cost in southern Lebanon in the summer of 2006. Even America's allies in the midst of a Global War on Terror such as Pakistan, according to President Pervez Musharraf, have occasionally faced the unpleasant prospect of being 'bombed back to the stone age' if their commitment to root out terrorists and their networks ever wavered.

For those of us living in Europe and North America, geopolitics might at first appear to have less relevance – something to be applied to more turbulent areas of the world. This is a mistaken view. Geopolitics is also part of our everyday lives and by 'our' I

A Guide to Spatial History Konrad Lawson, Riccardo Bavaj, Bernhard Struck, 2022-01-07 This guide provides an overview of the thematic

areas analytical aspects and avenues of research which together form a broader conversation around doing spatial history. Spatial history is not a field with clearly delineated boundaries. For the most part it lacks a distinct unambiguous scholarly identity. It can only be thought of in relation to other typically more established fields. Indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields. Consequently it must be discussed in relation to a variety of historiographical contexts. Each of these have their own intellectual genealogies, institutional settings and conceptual path dependencies. With this in mind, this guide surveys the following areas: territoriality, infrastructure and borders, nature environment and landscape, city and home, social space and political protest spaces, knowledge spatial imaginaries, cartographic representations and historical GIS research.

The Routledge Handbook to the Political Economy and Governance of the Americas Olaf Kaltmeier, Anne Tittor, Daniel Hawkins, Eleonora Rohland, 2020-01-09. This handbook explores the political economy and governance of the Americas, placing particular emphasis on collective and intertwined experiences. Forty-six chapters cover a range of Inter American key concepts and dynamics. The flow of peoples, goods, resources, knowledge and finances have on the one hand promoted interdependence and integration that cut across borders and link the countries of North and South America, including the Caribbean together. On the other hand, they have contributed to profound asymmetries between different places. The nature of this transversally related and multiply interconnected hemispheric region can only be captured through a transnational multidisciplinary and comprehensive approach. This handbook examines the direct and indirect political interventions, geopolitical imaginaries, inequalities, interlinked economic developments and the forms of appropriation of the vast natural resources in the Americas. Expert contributors give a comprehensive overview of the theories, practices and geographies that have shaped the economic dynamics of the region and their impact on both the political and natural landscape. This multidisciplinary approach will be of interest to a broad array of academic scholars and students in history, sociology, geography, economics and political science, as well as cultural, postcolonial, environmental and globalization studies.
