Art, Agency and the Continued Assault on Authorship Simon Blond,2022-10-31 This book presents a counter history to the relentless critique of the humanist subject and authorial agency that has taken place over the past fifty years It is both an interrogation of that critique and the tracing of an alternative narrative from Romanticism to the twenty first century which celebrates the agency of the artist as a powerful contribution to the wellbeing of the community It does so through arguments based on philosophical aesthetics and cultural

theory interspersed with case histories of particular artists It also engages with a second issue that cannot be separated from the first This is the question of what the role and purpose of art is in society This has become particularly important since the 1990s because of the social turn in art in which it is claimed that the only valid role for art was one that had explicit social consequences This book argues that a political role for art is valuable but not the only one that can be envisaged nor indeed is it the most obvious or most important Art has other social roles both as a means to engender empathy and community and to re enchant a world bereft of meaning and reduced to material values The book will appeal to practising artists as well as scholars working in art history philosophy aesthetics and curatorial studies

Post-Exceptionalism Arne De Boever, 2025-01-31 Postmodernism has come and gone but the belief that artists and works of art are exceptional is alive and well Post Exceptionalism speculates that this is so because postmodernism when it declared the death of the author and celebrated the copy failed to name political theology as its fundamental target In a time when sovereignty is experiencing a dubious global revival the moment has come to reconsider the artist and the work of art after political theology in search for a new worldly and emancipatory politics of aesthetics

Subject, Society and Culture Roy Boyne, 2008-03-25 This is a highly original indeed an extraordinary book standing out among the conventional philosophical treatments of subjectivity and reaching beyond the conventional area of investigation Boyne's feat is to find overlooked and unexplored angles which recast one of the perennial and ostensibly thoroughly familiar philosophical issues in a novel and fascinating light Zygmunt Bauman This book explores the relationships between visual culture social theory and the individual Visual culture has emerged as a central area of debate and research in contemporary sociology yet the field is still underdefined In particular the relationship between visual culture and the individual remains obscure Sociologists have insisted that all aspects of the individual are open to sociological explanation The result is that the individual sometimes seems to have been theorized away from sociological understanding Using a wide range of resources from Bourdieu's action theory and the contribution of actor network theory through to the artistic explorations of Francis Bacon and Barnett Newman this book shows how the concept of the individual is being reconstructed
