the 21 Century Classroom Festus E. Obiakor, Alicja Rieger, Anthony F. Rotatori, 2015-09-01 The purpose of this book is to provide a forum for an interdisciplinary scholarly dialogue with regard to preparing teachers for early childhood special education. In addition, it is aimed at examining and making available relevant and most recent scholarship to practitioners and at addressing critical issues and perspectives around preparing effective educators for the 21st century classroom and the future. This book intends to illuminate a complex and challenging task of preparing effective educators through the lenses of several educational disciplines including but not limited to teacher education, general education, special education, early childhood education, and urban education. The information in this work will focus on several educational disciplines that have the most immediate implications for teacher preparation and practice. The overall educational knowledge base will be enhanced due to the educational interdisciplinary approach. This has additional implications for teacher education, special education, educational leadership, curriculum and instruction, educational policy, and urban education to name a few. The multidimensional nature of the book gives it the freedom to highlight multiple and diverse voices while at the same time providing a forum for different and sometimes divergent methodologies, philosophies, and ideologies. **The Ultimate Atlanta School Guide 2004** Atlanta Journal-Constitution, The, David A. Milliron, 2004 Assessing English Language Learners in the Content Areas Florin Mihai, 2010-06-11 Assessing English Language Learners in the Content Areas A Research into Practice Guide for Educators seeks to provide guidance to classroom teachers, staff developers, and test item designers who want to improve ELL assessment outcomes, particularly in the areas of math, science, and social studies. The first two chapters of the book establish the background for the discussion of content area assessment for ELLs, examining several important characteristics of this rapidly growing student population as well as critical legislation affecting ELLs and providing a description of various forms of assessment, including how ELL assessment is different from the assessment of English proficient students. Important assessment principles that educators should use in their evaluation of tests or other forms of measurement are provided. Other chapters review ELL test accommodations nationwide because surprisingly most teachers do not know what they can and cannot allow, and the research on the effectiveness of these types of accommodations. The book analyzes the characteristics of alternative assessment; it discusses three popular alternative assessment instruments: performance assessment, curriculum-based measurement, and portfolios, and makes recommendations as to how to increase the validity, reliability, and practicality of alternative assessments. The book proposes fundamental assessment practices to help content area teachers in their evaluation of their ELL progress.
