Dust Explosion Dynamics Russell A. Ogle, 2016-09-10 Dust Explosion Dynamics focuses on the combustion science that governs the behavior of the three primary hazards of combustible dust dust explosions flash fires and smoldering It explores the use of fundamental principles to evaluate the magnitude of combustible dust hazards in a variety of settings Models are developed to describe dust combustion phenomena using the principles of thermodynamics transport phenomena and chemical kinetics Simple tractable models are described first and compared with experimental data followed by more sophisticated models to help with future challenges Dr Ogle introduces the reader to just enough combustion science so that they may read interpret and use the

scientific literature published on combustible dusts This introductory text is intended to be a practical guide to the application of combustible dust models suitable for both students and experienced engineers It will help you to describe the dynamics of explosions and fires involving dust and evaluate their consequences which in turn will help you prevent damage to property injury and loss of life from combustible dust accidents Demonstrates how the fundamental principles of combustion science can be applied to understand the ignition propagation and extinction of dust explosions Explores fundamental concepts through model building and comparisons with empirical data Provides detailed examples to give a thorough insight into the hazards of combustible dust as well as an introduction to relevant scientific literature

Process Safety Calculations Renato Benintendi, 2017-10-31 Process Safety Calculations is an essential guide for process safety engineers involved in calculating and predicting risks and consequences The book focuses on calculation procedures based on basic chemistry thermodynamics fluid dynamics conservation equations kinetics and practical models This book provides helpful calculations to demonstrate compliance with regulations and standards Standards such as Seveso directive s COMAH CLP regulation ATEX directives PED directives REACH regulation OSHA NIOSH and UK ALARP are covered along with risk and consequence assessment stoichiometry thermodynamics stress analysis and fluid dynamics Includes realistic engineering models with validation from CFD modeling and or industry testing Provides an introduction into basic principles that govern process relationships in modern industry Helps the reader find and apply the right principles to the specific problem being solved mitigated or validated
