Gleitman Gross Reisberg Psychology 8th Edition:

Psychology Henry Gleitman, James J. Gross, Daniel Reisberg, 2011 The most intelligent book ever written for the course reinvented for today's students

The Psychology of Friendship and Enmity Rom Harré, Fathali M. Moghaddam, 2013-10-21 This two volume exploration of what might be termed interpersonal war and peace reveals why individuals and groups coalesce or collide and how more positive relationships can be achieved In this two volume set the most comprehensive treatment of its subject to date eminent social scientists explore the processes involved in becoming friends or enemies

Volume 1 Interpersonal and Intrapersonal Insights focuses on friendship and enmity between individuals examining situations that arise in romances at school at work and between races genders and sexual identities The text is enriched by a discussion of individual interactions in classic books and movies what those stories reflect and what they teach about human nature

Volume 2 Group and Intergroup Understanding focuses on group dynamics across time and around the globe Topics range from group interactions before and after the American Civil War to friendship and enmity between Afghans and Americans today The work's ultimate concern however is to present ways in which individuals groups and nations can learn to be friends

A Psychology for People of God E. Rae Harcum, 2012-04-19 This book combats the anti religious sentiment of some psychologists It argues that Christians do not have to give up their religious faith to keep the contributions of science A science compatible with religion accepts that human beings have freedom of will to select behaviors and that all methods of studying human behavior are acceptable Both of these premises are accepted by a modern view of science which recognizes its inherent subjectivity E Rae Harcum explicitly asserts the important role of spirituality in psychology especially in psychotherapy The book confronts the relation between the human body and its non material parts the mind and spirit and provides a way of looking at these metaphysical issues

A Psychology for People of God promotes the need of the Christian to love and to care for his or her fellows After all fitness for survival entails the willingness to serve

Principles of Psychology in Religious Context E. Rae Harcum, 2012-12-07 This book asserts that the better one understands the causes of behavior the better one can apply that knowledge to produce a better world It describes the mechanisms that cause human behavior such as freedom of will in a manner consistent with religious beliefs It also asserts that all avenues for studying human behavior like intuition and prayer are acceptable and necessary Thus when studying the agent of human action we must rely on faith logic and intuition in addition to the full use of empirical science

Principles of Psychology for People of God begins with a description of the nervous system and continues with chapters on development perception internal states learning memory and the ultimate selection of behaviors Nevertheless it steadfastly emphasizes that behavior is not produced by physical mechanisms alone but also by a non material spirit that can transcend some inheritances and environments

Principles of Noology Seng-Beng Ho, 2016-06-29 The idea of this book is to establish a new scientific discipline noology under which a set of fundamental principles are proposed for the characterization of both naturally occurring and artificial intelligent systems The methodology adopted in Principles of Noology for the characterization of intelligent systems or noological systems is a computational one much like that of AI Many AI devices such as predicate logic representations search mechanisms heuristics and computational learning mechanisms are employed but they are recast in a totally new framework for the characterization of noological systems The computational approach in this book provides a quantitative and high resolution understanding of noological processes and at the same time the principles and methodologies formulated are directly implementable in AI systems In contrast to traditional AI that ignores motivational and affective processes under the paradigm of noology motivational and affective processes are central to the functioning of noological systems and their roles in noological processes are elucidated in detailed computational terms In addition a number of novel representational and learning mechanisms are proposed and ample examples and computer simulations are provided to show their applications These include rapid effective causal learning a novel learning mechanism that allows an AI noological system to learn causality with a small number of training instances learning of scripts that enables knowledge chunking and rapid problem solving and learning of heuristics that further accelerates problem solving Semantic grounding allows an AI noological system to truly understand the meaning of the knowledge it encodes This issue is extensively explored This is a highly informative book providing novel and deep insights into intelligent systems which is particularly relevant to both researchers and students of AI and the cognitive sciences

The Building Blocks of Thought Stephen Laurence, Eric Margolis, 2024-12-17 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on Oxford Academic and offered as a free PDF download from OUP and selected open access locations This is a broad and authoritative study of one of the central topics in the study of the mind the origins of concepts The authors survey the debate between rationalists and empiricists which stretches back to the very beginnings of philosophy and has been at the centre of some of the most exciting research in cognitive science Many have charged that the debate is riddled with confusion or that rationalist approaches in particular are deeply problematic The Building Blocks of Thought offers a comprehensive rethinking of the foundations of this debate showing that these negative appraisals are based on misunderstandings Stephen Laurence and Eric Margolis argue that the debate should be understood to concern the nature of the unlearned psychological traits that provide the foundation for learning all concepts They go on to argue for a version of concept nativism according to which there is a rationalist account of the origins of many concepts across many

different conceptual domains This rationalist view is developed around seven distinct arguments drawing on a wealth of data across the cognitive sciences which are shown to come together to form a unified large scale argument to the best explanation for a rationalist account of the origins of concepts Rounding out the case for concept nativism the book contrasts this view with the most important and influential empiricist views as well as alternative rationalist views including Fodor s infamous radical concept nativism and his claim that concept learning is impossible The Building Blocks of Thought argues for the enormous importance of learning and culture showing how a thoroughly rationalist approach facilitates and enhances cultural learning and provides the foundations for the best overall account of the origins of concepts *How the Mind Comes Into Being* Martin V. Butz, Esther F. Kutter, 2017 Provides an interdisciplinary perspective helping the reader to develop an understanding of how the mind works that goes beyond disciplinary boundaries Adopts a computational approach helping the reader to understand the mind on a functional level in contrast to purely conceptual verbalized levels Includes exercises and examples helping the reader to consolidate the covered material and encouraging them to think outside of the box **Toward a Theory of Everything** Frederick Douglas Harper, 2018-11-27 Toward a Theory of Everything is a book of creative prose and poetry The first section of the book is a discussion of thoughts toward a theory of everything which posits two existences the spiritual existence and the physical existence Featured poem titles include A Birthday Prayer A Prayer for the Suicide Prone Ode to Oprah A Prayer for Pope Francis Black Lives Matter Because Fake Friends Ode to Strong Black Woman Misty Copeland Beware of Destructive People and Shades of Motherhood The last section of the book in prose presents inspirational and insightful quotes
