Finding Solutions for a Better Tomorrow

It's not too late to take action on the climate crisis. There are important steps that governments and individuals can take towards solving it.

The main cause of the crisis is human emission of greenhouse gases, such as carbon dioxide, into the atmosphere. Transitioning to clean energy such as wind, solar and hydro will reduce fos-

sil fuel emissions and slow down the rate of global warming.

Another significant advance will be to make buildings, vehicles and appliances more energy-efficient, which governments can achieve by introducing regulations and incentives.

Changes to the way we carry out agriculture, including reforestation – because trees absorb

carbon dioxide – will also help.

A further crucial step towards sustainability will be to support and fund research and development of clean technologies.

Transportation is a major emitter of greenhouse gases, so encouraging the adoption of electric and hybrid vehicles, and public transportation, will also make an important impact.
