

This solutions manual provides answers to all the exercises in my book *Linear Algebra Done Right*. It is distributed (without charge) only to instructors who are using *Linear Algebra Done Right* as a textbook. If you are such an instructor, please contact me (preferably via e-mail) to obtain the appropriate version of the solutions manual. This version of the solutions manual is intended to accompany the second edition (1997) of *Linear Algebra Done Right*.

This solutions manual is copyrighted by me, but instructors using *Linear Algebra Done Right* as a textbook have permission to modify and/or abridge this solutions manual and to distribute copies only to students enrolled in their courses (if students are charged for copies, the price may not exceed the cost of materials and reproduction). If you want to modify and/or abridge this solutions manual, you can request (via e-mail) the L^AT_EX file from me (or from Springer if I am no longer around).

Some instructors may not want to distribute any of these solutions to students; other instructors may want to save class time by distributing to students solutions to some or even many of the exercises. Obviously students should not see the solution to an exercise until they have attempted the exercise themselves. Please do not distribute solutions needlessly, especially if there is a danger that many solutions will get passed down to next year's class. I will not distribute this solutions manual to students, so if neither you nor colleagues in your department make copies for students, you can be reasonably confident that your students are working the exercises without benefit of these solutions.

This solutions manual has not been subjected to the same amount of scrutiny as the book, so errors are more likely. I would be grateful for information about any errors that you notice. If you know nicer solutions to any of the exercises than the solutions given here, please let me know so that I can improve future versions of this solutions manual.

Please check my web site for errata and other information about *Linear Algebra Done Right*. I welcome comments about either the book or the solutions manual.

Have fun!
