

## How to Write a Psychology Lab Report

A psychology lab report describes an experiment and take the same format used in professional journal articles. If you are unsure of how a journal article is organized, look at some examples in psychology journals to get an idea of how your lab report will look.

### **Lab Report Structure:**

#### **Title Page:**

The title page should be the first page of your lab report. It should include important information such as the name of your paper, your name, and your academic affiliation. You can find more specific information about how to structure the first page of your lab report in this overview of how to write a title page and check out an example of a title page.

#### **Abstract:**

The abstract should be the second page of your lab report. An abstract is a brief synopsis of your report, usually no longer than a paragraph. According to the American Psychological Association (APA) style guide, your abstract should be between 150 and 250 words, although specific requirements may vary depending upon your instructor or the academic journal.

#### **Introduction:**

Your paper should begin with an introduction that outlines previous research on the topic, explains the goals of your current research, and provides your hypothesis. This section is usually several pages long and requires significant research in order to provide a sufficient overview of previous research on the topic. Remember to give proper citation to all sources.

#### **Method:**

The next section of your lab report will be the method section. In this portion of your report, you will describe the procedures used in your experiment. Information you should provide includes number of participants, background of participants, your independent and dependent variables, and the type of experimental design you used.
