Children's Palliative Care: An International Case-Based Manual Julia Downing, 2020-04-01
This manual enables individuals working in children's palliative care (CPC) globally to learn through engaging real world cases
The aim is to provide a clinical case based resource that is globally relevant and accessible to those working in CPC
Drawing on case histories from around the world that reflect key issues and elements of CPC it provides a practical approach grounded in experience
It addresses multidisciplinary care in the management of children and their families
discusses cases from an international perspective and shares examples from a variety of countries utilising cases across a range of ages and conditions demonstrating holistic care
It represents the first case based manual on global CPC and is endorsed and promoted by the International Children's Palliative Care Network (ICPCN)
Children's palliative care is a rapidly developing field both in the UK and internationally
The provision of CPC varies considerably with provision often being insufficient and over 65% of countries having no recognised CPC service provision whatsoever
As such while there are an estimated 21.6 million children who require palliative care in many areas of the world CPC is poor or non-existent and children are treated like little adults without their distinctive needs being recognised or understood
There is also a dearth of literature on CPC hence this clinical case based manual fills a gap in the market and is aimed at a global audience making it a unique text in the field
