Chemistry in Primetime and Online National Research Council, Division on Earth and Life Studies, Board on Chemical Sciences and Technology, Chemical Sciences Roundtable, 2011-08-01 It is critical that we increase public knowledge and understanding of science and technology issues through formal and informal learning for the United States to maintain its competitive edge in today's global economy Since most Americans learn about science outside of school we must take advantage of opportunities to present chemistry content on television the Internet in museums and in other informal educational settings In May 2010 the National Academies Chemical Sciences Roundtable held a workshop to examine how the public obtains scientific information informally and to discuss methods that chemists can use to improve and expand efforts to reach a general nontechnical audience Workshop participants included chemical practitioners e.g. graduate students postdocs professors administrators experts on informal learning public and private funding organizations science writers bloggers publishers and university communications officers and television and Internet content producers Chemistry in Primetime and Online is a factual summary of what occurred in that workshop Chemistry in Primetime and Online examines science content especially chemistry in various informal educational settings It explores means of measuring recognition and retention of the information presented in various media formats and settings Although the report does not provide any conclusions or

recommendations about needs and future directions it does discuss the need for chemists to connect more with professional writers artists or videographers who know how to communicate with and interest general audiences It also emphasizes the importance of formal education in setting the stage for informal interactions with chemistry and chemists *Books in Print* ,1994 **Laboratory Science Guide for Secondary Schools** Kansas State Teachers College of Emporia,1954

Hentschel,2002 Ever since the boom of spectrum analysis in the 1860s spectroscopy has become one of the most fruitful research technologies in analytic chemistry physics astronomy and other sciences This book is the first in depth study of the ways in which various types of spectra especially the sun s Fraunhofer lines have been recorded displayed and interpreted

The book assesses the virtues and pitfalls of various types of depictions including hand sketches woodcuts engravings lithographs and from the late 1870s onwards photomechanical reproductions The material of a 19th century engraver or lithographer the daily research practice of a spectroscopist in the laboratory or a student's use of spectrum posters in the classroom all are looked at and documented here For pioneers of photography such as John Herschel or Hermann Wilhelm Vogel the spectrum even served as a prime test object for gauging the color sensitivity of their processes This is a broad contextual portrayal of the visual culture of spectroscopy in the 19th and early 20th centuries The illustrations are not confined to spectra they show instruments laboratories people at work and plates of printing manuals The result is a multifaceted description focusing on the period from Fraunhofer up to the beginning of Bohr's quantum theory A great deal of new and fascinating material from two dozen archives has been included A must for anyone interested in the history of modern science or in research practice using visual representations **Community and Junior College Journal** ,1977
