EPA Publications Bibliography United States. Environmental Protection Agency,1987 *Handbook of Blended Shore Education* Gabriele Strohschen,2008-11-07 As we confront the future of our professional endeavors we tend to rely with con dence on longstanding and widely honored assumptions about the world and ourselves We believe we have accumulated sturdy structures of knowledge eff tive practices and sound values Yet we rely on these resources with scant c sciousness that in the long run our assumptions practices and values may not only be inimical to the viability of our profession but as well oppressive in their effects on others There is at least one assumption common across many professions and cultures that is of particular signi cance It is the assumption that the world is made up of discrete entities or units There are not only the species of plants and animals for example but there is me as opposed to you us vs them my business enterprise in competition with yours our nation or religion and yours And with this assumption of separable units we assemble ways of sustaining and protecting those units of which we feel a part We erect buildings laws schools governments and armies to ensure that what is inside the boundary will ourish and what is outside cannot threaten us In effect the assumption of a world of independent entities establishes the way in which we understand and conduct ourselves within relationships
