Encyclopedia of Information Systems and Services, 1989 **Migration, Tourism and Social Sustainability** Jaeyeon Choe, Peter Lugosi, 2023-03-21 The distinctions between tourism and migration are increasingly blurred Tourism often drives various forms of mobility and an international workforce is essential to maintaining functioning tourism economies This book explores intersections of tourism and migration considering their relationships with and impacts on

social sustainability The chapters explore in a variety of contexts how the planning development and governance of tourism affects the sustainability of communities which consequently influences attitudes towards migrants and tourists They also consider how migrant local connections may evolve creating opportunities for positive symbiotic co existence or intergroup tensions and exploitative relationships The book paves the way for future work examining new forms and interactions between migration and tourism that contribute to social sustainability This book will be of great value to students academics and researchers interested in tourism geography migration diaspora studies and sociology The chapters in this book were originally published as a special issue of *Tourism Geographies* Encyclopedia of Information Systems and Services Amy Lucas,1986-12 The B T H and North British Type 1 Bo-Bo Diesel-Electric Locomotives - British Railways Classes 15 and 16 Anthony P. Sayer,2021-12-30 The British Railways Pilot Scheme orders of 1955 included ten BTH and ten NBL Type 1 locomotives these being introduced during 1957 61 for use in East London and on the Great Eastern and London Tilbury Southend lines The BTH fleet subsequently expanded to forty four as a consequence of their light axle loading and the availability of spare manufacturing capacity which BR chose to exploit in their quest to eliminate steam traction Further construction of these two classes ceased after the fifty four units with preference being given to the highly reliable English Electric product which by mid 1962 had proliferated to 128 examples The NBL fleet survived until 1968 being withdrawn after ten years of indifferent performance The BTH locomotives followed by 1971 although four lingered on as carriage pre heating units Dramatic reductions in goods traffic during the 1960s 70s particularly impacted local trip and transfer freight duties the bread and butter work for the Type 1s and it was inevitable that the less successful classes were retired from traffic first This book looks at the short history of these two classes making extensive use of archive sources combined with the primary observations of numerous enthusiasts Previously unpublished information covering the introduction appearance design and performance issues of the locomotives form a central focus and allocations works histories storage and disposals liveries and detail differences are covered in the same level of detail as previous volumes in the Locomotive Portfolio series
