

Exercises:

In this laboratory you will examine various aspects of human digestive system.

Part 1: Examination of Isolated Plastinated Specimens

Please examine the plastinated specimens of pancreas/small intestine, jejunum, ileum, stomach and liver.

1. For pancreas/small intestine, try to find the basic anatomy of the biliary system. Note the **hepatic ducts, the cystic duct, the common bile duct, the gall bladder, and the pancreatic duct**. Also, note that gall stones can move down the common bile duct and block the pancreatic duct as well, causing digestive juices of the pancreas to back up and digest the pancreas itself.
2. For jejunum and ileum, please note the increased surface area provided by the villi. Also, note the fuzzy appearance of the villi, indicating the presence of microvilli.
3. For stomach, please note the basic parts including the fundus, lesser curvature, greater curvature, cardiac sphincter and pyloric sphincter.
4. For liver, please note the four lobes of the liver and the position of the gall bladder.

gall stones block pancreatic duct
↓
digestive enzymes get stuck in pancreas
↓
enzymes digest pancreas
↓
pancreatitis
↓
weak digestive enzymes in blood
↓
digest self
↓
cancer

Part 2: Examination of Isolated Preserved (wet) specimens

Please review the available wet specimens and the noted pins. All specimens and pins are fair game on the practical.

Part 3: Examination of the Cadaver

1. **Esophagus** - thoracic portion in mediastinum coursing posterior to the heart and the very short abdominal portion just inferior to diaphragm.
2. **Stomach** - identify its 4 regions (cardiac, fundus, body, pyloric). Also find the greater and lesser curvatures with greater omentum attached to greater curvature and lesser omentum

Lab Guide For Labpaq The Digestive System
