Labour Law Utopias Nicolas Bueno,Beryl ter Haar,Nuna Zekic,2024-07-17 Labour Law Utopias Post Growth Post Productive Work Approaches engages with new socioeconomic ideas that look beyond the current growth driven competitive market economy Building on analysis of economic growth as well as the limits of the logic of human productivity and competitiveness for workers and the environment it explores alternative approaches and what those will mean for work in general and labour law in particular The concept of post growth is used to rethink the purpose of the economy by looking beyond merely increasing wealth consumption and production considering what this means for the position of work in society as well as the individual worker The post productive work approach is used to question the centrality of economically productive work and its regulation in labour laws The chapters in this book take a progressive approach and discuss whether and how labour law can contribute to the emancipation of work from the constraints of growth and productivity by revisiting the value organization and impact of work With these utopian ideas for labour law the contributions in this book present inspirational dots on the horizon that could

guide the direction of changes in labour law as it navigates issues such as the implementation of digital and green solutions the energy crisis migration rising inequality and precariousness This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on Oxford Academic and offered as a free PDF download from OUP and selected open access locations **Reader's Guide to the Social Sciences** Jonathan Michie, 2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense 2400 Business Books and Guide to Business Literature New Jersey.
