Learn Xtra Grade11 Maths P:

The Learning and Teaching of Mathematical Modelling Mogens Niss, Werner Blum, 2020-01-16 This book takes stock of the state of affairs of the teaching and learning of mathematical modelling with regard to research development and practice It provides a conceptual framework for mathematical modelling in mathematics education at all education levels as well as the background and resources for teachers to acquire the knowledge and competencies that will allow them to successfully include modelling in their teaching with an emphasis on the secondary school level Mathematics teachers mathematics education researchers and developers will benefit from this book Expertly written and researched this book includes a comprehensive overview of research results in the field an exposition of the educational goals associated with modelling the essential components of modelling competency and an extensive discussion of didacticopedagogical challenges in modelling Moreover it offers a wide variety of illuminating cases and best practice examples in addition to insights into the focal points for future research and practice The Learning and Teaching of Mathematical Modelling is an invaluable resource for teachers researchers textbook authors secondary school mathematics teachers undergraduate and graduate students of mathematics as well as student teachers

Milliken's Complete Book of Math Reproducibles - Grade 1, 2009-09-01 This activity book of over 110 ready to use reproducible pencil to paper worksheets are ideal for enrichment or for use as reinforcement Perfect for use at school or as homework they feature basic math skills including fractions decimals measurement time money and much more

Cooperative Learning and the Collaborative School Ronald S. Brandt, 1991 Cooperation in the classroom counteracts well established routines and values that nearly all adults and many educators take for granted Education remains a fiercely competitive enterprise and individualistic notions of professionalism predominate Despite the continued importance of independence initiative and personal achievement today s schools are experimenting with consideration sharing collegiality and commitment to group goals This volume contains readings from recent editions of Educational Leadership on cooperative learning and collaborative schools beginning with Robert Slavin s introduction and Ronald Brandt s insistence that cooperation is not un American The articles in the second section discuss various cooperative learning models including Team Assisted Individuation Cooperative integrated Reading and Composition and Group Investigation The third section is devoted to implementation of cooperative learning and the fourth section highlights the idea of schools as caring communities developed through group work The sixth section provides ideas on how to get started and the seventh section summarizes controversies among various researchers The final section presents articles on the collaborative school focusing on developing teacher collegiality cooperative professional development and school improvement efforts The volume ends with an extensive annotated bibliography divided into nine parts MLH
