 teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers
 guides across the projects differ and find substantial variation in the design and structure of the documents We develop a
 scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs
 that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half
 year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we
 find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the
 utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach
 children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was
 described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional
 routines designed in the guide The report includes a set of research based guidelines that material developers can use to
 develop teachers guides that will support effective instructional practices and help improve learning outcomes The key
 takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers
 guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not
