 Jonkman,2024-11-12 How Colombian mining communities navigate state power in a context of criminalization and political
 neglect In the Choc rainforests of Colombia local and settler miners turn to gold as a means to get by and get ahead on the
 margins of capitalism They eke out livelihoods while worrying about the declining richness of subsoils their heightened
 persecution by state troops the stigmatizing language of politicians and the extortion of paramilitaries and guerrillas
 Underground Politics follows the everyday sociopolitical life of this supposedly lawless gold frontier revealing how gold
 mining communities in Choc navigate state power in a context of criminalization and political neglect Drawing on
 ethnographic encounters and conversations in mining regions Jesse Jonkman traces how miners and their surrounding
 communities reappropriate the state s legal and bureaucratic tools for their own ends Far from being outside of state
 governance or only on the receiving end of it mining stakeholders involve legal categories and representatives of the state in
 their daily organizational practices rendering mundane and lawful a livelihood that official discourses deem destructive and
 illegal In so doing they bring about another kind of state presence in their gold frontier through what Jonkman calls
 underground politics the process by which those ostensibly working outside of state structures are nonetheless active
 participants in bottom up state making In Choc gold gives rise to social and ecological violence Yet Jonkman shows it also ties
 into cultural ideals of autonomy stories of identity and prosperity and local political formations that simultaneously erode and
 confirm the authority of the state Underground Politics unearths contentious forms of extractive organization that while
 contradicting the formal regulatory framework are nevertheless constitutive of state power *Aurora 7* Colin
 Burgess,2015-08-28 TO A NATION enthralled by the heroic exploits of the Mercury astronauts the launch of Lt Cmdr Scott
 Carpenter on NASA s second orbital space flight was a renewed cause for pride jubilation and celebration Within hours that

excitement had given way to stunned disbelief and anxiety as shaken broadcasters began preparing the American public for the very real possibility that an American astronaut and his spacecraft may have been lost at sea In fact it had been a very close call Completely out of fuel and forced to manually guide Aurora 7 through the frightening inferno of re entry Carpenter brought the Mercury spacecraft down to a safe splashdown in the ocean In doing so he controversially overshot the intended landing zone Despite his efforts Carpenter s performance on the MA 7 mission was later derided by powerful figures within NASA He would never fly into space again Taking temporary leave of NASA Carpenter participated in the U S Navy s pioneering Sealab program For a record 30 days he lived and worked aboard a pressurized habitat resting on the floor of the ocean becoming the nation s first astronaut aquanaut explorer Following extensive research conducted by noted spaceflight historian Colin Burgess the drama filled flight of Aurora 7 is faithfully recounted in this engrossing book along with the personal recollections of Scott Carpenter and those closest to the actual events
