Language in Epistemic Access Caroline Kerfoot, Anne-Marie Simon-Vandenberg, 2018-07-26 This book focuses on how to address persistent linguistically structured inequalities in education primarily in relation to South African schools but also in conversation with Australian work and with resonances for other multilingual contexts around the world The book as a whole lays bare the tension between the commitment to multilingualism enshrined in the South African Constitution and language in education policy and the realities of the dominance of English and the virtual absence of indigenous African languages in current educational practices It suggests that dynamic plurilingual pedagogies can be allied with the explicit scaffolding of genre based pedagogies to help redress asymmetries in epistemic access and to re-imagine policies pedagogies and practices more in tune with the realities of multilingual classrooms The contributions to this book offer complementary insights on routes to improving access to school knowledge especially for learners whose home language or language variety is different to that of teaching and learning at school All subscribe to similar ideologies which include the view that multilingualism should be seen as a resource rather than a problem in education Commentaries on these chapters highlight evidence based high impact educational responses and suggest that translanguaging and genre may well offer opportunities for students to expand their linguistic repertoires and to bridge epistemological differences between community and school This book was originally published as a special issue of Language and Education

The Age of Post-Rationality Val Colic-Peisker, Adrian Flitney, 2017-10-24 This book challenges the hegemonic view that economic calculation represents the ultimate rationality The West legitimises its global dominance by the claim to be a rational democratic science based and progressive civilisation Yet over the past decades the dogma of economic rationality has become an ideological black hole whose gravitational pull allows no public debate or policy to escape Political leaders of all creeds are held in its orbit and public language is saturated by it This dogma has pervaded all spheres of life ushering the age of post rationality especially in English speaking countries The authors discuss several aspects of post rational global capitalism still dominated by the Anglosphere hyper competition hyper consumption inequality volatile global financial markets environmental degradation and the unforeseen effects of the internet mediated communication revolution The book concludes by discussing some utopian and dystopian future scenarios

and asking whether the West can transcend its crisis of rationality

The Gunpowder Age Tonio Andrade, 2017-08-29 A first look at gunpowder's revolutionary impact on China's role in global history The Chinese invented gunpowder and began exploring its military uses as early as the 900s four centuries before the technology passed to the West But by the early 1800s China had fallen so far behind the West in gunpowder warfare that it was easily defeated by Britain in the Opium War of 1839-42 What happened In *The Gunpowder Age* Tonio Andrade offers a compelling new answer opening a fresh perspective on a key question of world history why did the countries of western Europe surge to global importance starting in the 1500s while China slipped behind Historians have long argued that gunpowder weapons helped Europeans establish global hegemony Yet the inhabitants of what is today China not only invented guns and bombs but also as Andrade shows continued to innovate in gunpowder technology through the early 1700s much longer than previously thought Why then did China become so vulnerable Andrade argues that one significant reason is that it was out of practice fighting wars having enjoyed nearly a century of relative peace since 1760 Indeed he demonstrates that China like Europe was a powerful military innovator particularly during times of great warfare such as the violent century starting after the Opium War when the Chinese once again quickly modernized their forces Today China is simply returning to its old position as one of the world's great military powers By showing that China's military dynamism was deeper longer lasting and more quickly recovered than previously understood *The Gunpowder Age* challenges long standing explanations of the so called Great Divergence between the West and Asia
