Matric Maths Memo 2014 September:

Cyber Threat Chris Bronk, 2016-02-01 This book presents a holistic view of the geopolitics of cyberspace that have arisen over the past decade utilizing recent events to explain the international security dimension of cyber threat and vulnerability and to document the challenges of controlling information resources and protecting computer systems How are the evolving cases of cyber attack and breach as well as the actions of government and corporations shaping how cyberspace is governed What object lessons are there in security cases such as those involving Wikileaks and the Snowden affair An essential read for practitioners scholars and students of international affairs and security this book examines the widely pervasive and enormously effective nature of cyber threats today explaining why cyber attacks happen how they matter and how they may be managed The book addresses a chronology of events starting in 2005 to comprehensively explain the international security dimension of cyber threat and vulnerability It begins with an explanation of contemporary information technology including the economics of contemporary cloud mobile and control systems software as well as how computing and networking principally the Internet are interwoven in the concept of cyberspace Author Chris Bronk PhD then documents the national struggles with controlling information resources and protecting computer systems The book considers major security cases such as Wikileaks Stuxnet the cyber attack on Estonia Shamoon and the recent exploits of the Syrian Electronic Army Readers will understand how cyber security in the 21st century is far more than a military or defense issue but is a critical matter of international law diplomacy commerce and civil society as well

Constructing Allied Cooperation Marina E. Henke, 2019-10-15 How do states overcome problems of collective action in the face of human atrocities terrorism and the threat of weapons of mass destruction How does international burden sharing in this context look like between the rich and the poor the big and the small These are the questions Marina E Henke addresses in her new book *Constructing Allied Cooperation* Through qualitative and quantitative analysis of 80 multilateral military coalitions Henke demonstrates that coalitions do not emerge naturally Rather pivotal states deliberately build them They develop operational plans and bargain suitable third parties into the coalition purposefully using their bilateral and multilateral diplomatic connections what Henke terms diplomatic embeddedness as a resource As *Constructing Allied Cooperation* shows these ties constitute an invaluable state capability to engage others in collective action they are tools to construct cooperation Pulling apart the strategy behind multilateral military coalition building Henke looks at the ramifications and side effects as well As she notes via these ties pivotal states have access to private information on the deployment preferences of potential coalition participants Moreover they facilitate issue linkages and side payments and allow states to overcome problems of credible commitments Finally pivotal states can use common institutional contacts IO officials as cooperation brokers and they can convert common institutional venues into fora for negotiating coalitions The theory and evidence presented by Henke force us to revisit the conventional wisdom on how cooperation in multilateral military operations comes about The author

generates new insights with respect to who is most likely to join a given multilateral intervention what factors influence the strength and capacity of individual coalitions and what diplomacy and diplomatic ties are good for Moreover as the Trump administration promotes an America First policy and withdraws from international agreements and the United Kingdom completes Brexit Constructing Allied Cooperation is an important reminder that international security cannot be delinked from more mundane forms of cooperation multilateral military coalitions thrive or fail depending on the breadth and depth of existing social and diplomatic networks
