**Mediated Memories in the Digital Age** Jose van Dijck, 2022 Many people deploy photo media tools to document everyday events and rituals For generations we have stored memories in albums diaries and shoeboxes to retrieve at a later moment in life Autobiographical memory its tools and its objects are pressing concerns in most people s everyday lives and recent digital transformation cause many to reflect on the value and meaning of their own mediated memories Digital photo cameras camcorders and multimedia computers are rapidly replacing analogue equipment inevitably changing our everyday routines and conventional forms of recollection How will digital photographs lifelogs photoblogs webcams or playlists change our personal remembrance of things past And how will they affect our cultural memory The main focus of this study is the ways in which old and new media technologies shape acts of memory and individual remembrances This book spotlights familiar objects but addresses the larger issues of how technology penetrates our intimate routines and emotive processes how it affects the relationship between private and public memory and experience self and others

**How the World Changed Social Media** Daniel Miller, Elisabetta Costa, Nell Haynes, Tom McDonald, Razvan Nicolescu, Jolynna Sinanan, Juliano Spyer, Shriram Venkatraman, Xinyuan Wang, 2016-02-29 How the World Changed Social Media is the first book in Why We Post a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender education and commerce What is the result of the increased emphasis on visual communication Are we becoming more individual or more social Why is public social media so conservative Why does equality online fail to shift inequality offline How did memes become the moral police of the internet Supported by an introduction to the project s academic framework and theoretical terms that help to account for the findings the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

*The Digitalisation of Memory Practices in China* Maximilian Mayer, Frederik Schmitz, 2025-09-29 How is memory in China curated in the digital era This pioneering volume investigates the transformation of collective memory in China amid rapid technological change Introducing the concept of the curating state it reveals how digitalisation both supports and challenges

Hamer, 2020-02-17 Felicity Hamer explores how creative and sometimes contested incorporations of photography within online spaces demonstrate a revival and renegotiation of historic practices propelled by a desire to commemorate the death of a child

**The Qualified Self** Lee Humphreys, 2018-04-20 How sharing the mundane details of daily life did not start with Facebook Twitter and YouTube but with pocket diaries photo albums and baby books Social critiques argue that social media have made us narcissistic that Facebook Twitter Instagram and YouTube are all vehicles for me promotion In *The Qualified Self* Lee Humphreys offers a different view She shows that sharing the mundane details of our lives what we ate for lunch where we went on vacation who dropped in for a visit didn't begin with mobile devices and social media People have used media to catalog and share their lives for several centuries Pocket diaries photo albums and baby books are the predigital precursors of today's digital and mobile platforms for posting text and images The ability to take selfies has not turned us into needy narcissists it's part of a longer story about how people account for everyday life Humphreys refers to diaries in which eighteenth century daily life is documented with the brevity and precision of a tweet and cites a nineteenth century travel diary in which a young woman complains that her breakfast didn't agree with her Diaries Humphreys explains were often written to be shared with family and friends Pocket diaries were as mobile as smartphones allowing the diarist to record life in real time Humphreys calls this chronicling in both digital and nondigital forms media accounting The sense of self that emerges from media accounting is not the purely statistics driven quantified self but the more well rounded qualified self We come to understand ourselves in a new way through the representations of ourselves that we create to be consumed

**Platform and Agency** Mark Carrigan, 2025-12-31 This book examines how digital platforms are reconfiguring the parameters of agency and reflexivity in contemporary social life Drawing on Margaret Archer's social realist framework it moves beyond treating platforms merely as tools or environments to conceptualize them as distinct sociotechnical structures with emergent properties and powers that shape human action without determining it The book develops the concept of platform and agency to explore the temporal dimensions of sociotechnical change tracing how platforms condition personal and collective reflexivity through mechanisms of distraction cultural abundance and multiplying communication channels While affirming the analytical distinction between structure culture and agency it demonstrates how platforms constitute a fourth dimension necessary for understanding contemporary social morphogenesis Through the conceptual pairing of psychobiography and personal morphogenesis the book offers a nuanced account of how individuals become who they are within platformized lifeworlds Rather than announcing an epochal

break with previous social forms the analysis illuminates the accumulating consequences of platform mediation across biographical timescales This book will interest researchers and graduate students in social theory philosophy of technology digital sociology platform studies media and communication studies critical data studies internet studies surveillance studies sociology of knowledge digital anthropology and social informatics **Between the Public and Private in Mobile**

Harvey's music videos and opens up fresh avenues into exploring what is at stake in the video work of one of Britain's premier singer-songwriters. It extends the discussion on music video to consider how to make sense of the rapidly developing digital environment in which it now sits. The interdisciplinary nature of the book should attract readers from a range of subject areas including popular music studies, cultural studies, media and communication studies, and gender studies.

From Here to Hogwarts Christopher E. Bell, 2015-11-12. The social relations, societal structures, and existential conundrums in the world of Harry Potter novels reflect our own. When the authoritarianism of Hogwarts falls upon Harry, it is an echo of disciplinary practices in real-world high schools. The economic inequities of the wizarding world mirror those of modern societies. The art, literature, and mass media of wizard society reveal our deep-rooted fears. Harry's world is our world. This collection presents new essays by contributors across a range of disciplines, bringing fresh perspectives on one of the most influential texts in modern history.

**Sharing our Lives Online** David R. Brake, 2014-09-25. Why do we share so much about our lives on social media when we often have little idea who might be reading or viewing? David R. Brake examines the causes and consequences of moving towards a radically open society.

*The Second Offline* Hidenori Tomita, 2021-09-01. This book presents current research on mobile Internet society. Past research was not able to show a clear analytical framework; thus, it was unable to close in on the fundamental changes in that society. This book, however, analyzes mobile Internet society by introducing the concept of doubling of time and place and the analytical framework of the second offline. The emergence of the smartphone has made Internet use easier, and now people are constantly using online information in the midst of their daily lives. Our society is transitioning from the first offline society, a society without being connected to Internet, to the second offline society, where users are connected to the Internet at all times. In this second offline society, our sense of time and place are beginning to change. Broadcast and communication media have made possible the overlapping of different places, which has been called the doubling of place. Furthermore, virtual reality (VR) and augmented reality (AR) technologies have enabled the overlap of different times, which this book calls the doubling of time. The smartphone makes both possible. With the second offline and the doubling of time and place as keywords, the book takes into consideration research that includes, among other topics, the media usage of young adults, selfies, education, social media usage, mobile games, work stations, and consumer activity in the mobile Internet society.
