Community Activation for Integral Development Ronnie Lessem, 2016-12 Typically development studies have evolved top down with theories born and bred in the west affecting practices in the rest This book looks at these developments by turning them on their head instead starting bottom up with an emphasis on what the author terms Community Activation With a selection of case studies this volume looks at where community activation can be found and explores how it could evolve and be of use in developing societies at large In the process he addresses such topics as how to embed development in a particular society how to generate social and economic solidarity and how to generate wealth from pre industrial and post industrial networks

African Politics and Ethics Munyaradzi Felix Murove, 2020-10-06 In this book Munyaradzi Felix Murove explores African traditional ethical resources for African politics Arguing that African ethics is integral to African post colonial political contentious discourse Murove invites the reader to reflect on various problematic political issues in post colonial Africa and how African ethics has been applied in these situations Starting with a succinct discussion of the scope of African ethics he discusses how African ethical values have been applied by post colonial politicians in the reconstruction of their societies Further Murove looks critically at the issue of African poverty and how the ethic of regional integration and economic cooperation among post colonial African nation states has been instrumental to efforts aimed at overcoming the scourge of poverty The main question this book seeks to answer is Are African traditional ethical values a panacea to modern African political problems

Psychopathology in Women Margarita Sáenz-Herrero, 2019-07-15 This book examines sex and gender differences in the causes and expression of medical conditions including mental health disorders Sex differences are variations attributable to individual reproductive organs and the XX or XY chromosomal complement Gender differences are variations that result from biological sex as well as individual self representation which include psychological behavioural and social consequences of an individual s perceived gender Gender is still a neglected field in psychopathology and gender differences is often incorrectly used as a synonym of sex differences A reconsideration of the definition of gender as the term that subsumes masculinity and femininity could shed some light on this misperception and could have an effect in the study of health and disease This second edition of Psychopathology clarifies the anthropological cultural and social aspects of gender and their impact on mental health disorders It focuses on gender perspective as a paradigm not only in psychopathology but also in mental health disorders As such it promotes open mindedness in the definition and perception of symptoms as well as assumptions about those symptoms and raises awareness of mental health

Nhakanomics: Harvesting Knowledge and Value for Re-generation Through Social Innovation Ronnie Lessem, Munyaradzi Mawere, 2019-08-02 *Nhakanomics* Harvesting Knowledge and Value for Re generation Through Social Innovation is a radical departure from the commonly held belief that neo liberal economics from the US and the West is universal and is the only solution to underdevelopment and poverty throughout the world Instead the book teases out and theorises the intellectually rutted terrain of development studies and neo liberal economics from a decolonial Pan Africanist perspective Following a path of social innovation with perspectives drawn from social anthropology economics and business and management studies *Nhakanomics* is a unique socio economic approach applicable in the Global South and in Southern Africa in particular The study argues that the process and substance of *nhakanomics* with its pre emphasis on the relational South provides a robust and holistic approach to social innovation and social transformation grounded in relational networks and meshworks The central idea is a call to re GENE rate society through local Grounding and Origination and tapping into local global Emergent Foundations via a newly global Emancipatory Navigation while ultimately culminating in global local transformative Effects in four recursive cycles of re GENE rating C K umusha Culture Communication and Capital after re Constituting Africa the 5Cs With a novel and radical approach the book is an interrogation of neo liberal economics in the Global South As such this book is remarkably handy to students and practitioners in the fields of economics development studies political science science and technology studies business management sociology transformation studies and development related non Governmental Organisations working with grassroots communities
