International Tax Law Peter Antony Wilson, 2016-04-24 With the ongoing expansion of outbound foreign direct investment FDI in the countries representing the BRICS economic bloc Brazil Russia India China and South Africa and with all of them at the same time listed among the top seven countries plagued by tax evasion and avoidance in the guise of illicit outflows the governments both individually and through cooperative initiatives have devised new international tax strategies that are proving to be of great interest and value to other countries both developing and developed The core of these strategies addresses the necessity of stemming the outflow of revenue while strongly supporting FDI both inbound and outbound while complying with international obligations including those arising from human rights laws This book is the first in depth commentary on this new and evolving area of international tax law The detailed analysis covers the entire field of BRICS international tax law considering topics such as the following information exchange procedures and pitfalls response to the OECD's Base Erosion and Profit Sharing BEPS initiative role of bilateral and multilateral double taxation conventions including the Multilateral Instrument and the Bilateral Investment Treaties thin capitalization transfer pricing controlled foreign corporation rules shortcomings related to authorities limited manpower international audit and investigation procedures the BRICS approach to residence and mandatory and binding arbitration and the BRICS approach to shaping the

developing world's international tax system. Notably, the author personally conducted interviews with senior international representatives of the BRICS tax authorities as well as with leading BRICS academics and practitioners. Tax cases together with human rights and investment cases and administrative guidelines in all five countries are also included in the analysis. The study concludes with recommendations for improving each of the five countries' tax law and procedures, especially in the area of dispute resolution. The author's goal is to extend the existing body of knowledge of the BRICS international tax laws in order to assist in developing an understanding of the BRICS approach to dealing with evasion and avoidance, an approach which facilitates both outbound and inbound FDI, simplifies tax authority administration and establishes a basis for resolving international disputes which is compatible with sovereignty. In achieving this objective, the author has produced a major work that is of immeasurable value to tax advisers, government and governance officials, academics and researchers both in developing international taxation strategies and in helping to resolve disputes with tax authorities. *Tax Law,*

State-Building and the Constitution Dominic de Cogan, 2020-08-06. This monograph looks at how tax is intertwined with constitutional law and the state in the UK. It looks at a variety of topics including tax devolution, scrutiny and reform of tax legislation, the protection of taxpayers and the domestic legal processing of international rules and problems. *Tax Law, State Building and the Constitution* presents and interrogates five key claims. First, there is a clear overlap between the concerns of tax and constitutional lawyers. Secondly, the tax system is being deeply affected by the fast pace of constitutional change. Thirdly, decisions taken in the tax field are likely to have a reverse influence on the evolution of the constitution. Fourthly, these relationships are heavily context dependent, with tax making all the difference to some ongoing constitutional controversies whilst having very little to do with others. Fifthly, by acknowledging tax as an important moving part within the contemporary constitution, we might understand both tax and constitutional law a little better. The book therefore contributes to deeper theoretical debates on the identity of tax law as a discipline, the relevance of tax to public lawyers, the meaning of state building in the recent history of a developed country and the importance of public finances to a wider sense of what is going on. These are questions that ought to command the attention of tax and constitutional law academics as well as policy makers and reformers. Runner up of the 2022 SLS Peter Birks Prize for Outstanding Legal Scholarship. *China and International Commercial Dispute Resolution* Qiao Liu, Wenhua Shan, 2015-10-20. *China and International Commercial Dispute Resolution* presents important contributions from eminent legal scholars from Europe, the United States, Australia, South America and China in a variety of areas of international commercial law with relevance to China. The authors provide expert analyses from a number of perspectives: doctrinal, comparative, empirical, economic and legal, on an array of issues private and public involved in or arising from international commercial dispute resolution in China. **European Consumer Access to Justice Revisited** Stefan Wróblewski, 2015. This book asks what is European consumer access to justice and how we can improve it by means of procedural and substantive laws. *Unlocking Company Law* Susan McLaughlin, 2015-03-05.

Democratizing Legal Services Laura Snyder, 2016-10-11

We live in a law thick world. For individuals and organizations in both the public and private sectors, navigating the large number of complex laws, rules, institutions, and procedures that pervade American life is virtually impossible without some assistance. Some argue that there are too many lawyers. Others argue that the unmet need for legal services is so high that it constitutes a human rights crisis. This book exposes why it is easy to access legal services for some while it is virtually impossible for others, and why some lawyers have successful careers but others cannot. This book argues that the problems plaguing legal services in the US can be only be addressed by a radical overhaul of the rules that govern how legal services may be delivered, as well as radical changes to who exercises the power to make those rules. Through interviews with those with experience with alternative legal service providers, this book exposes the formidable obstacles that exist along the path to those changes, as well as the opportunities that await.
