Starting and turning off the engine

Before starting

Ensure that parking brake is engaged and that selector lever is in position "P" or "N". Turn electronic key in steering lock to position 2.

Starting

Do not depress accelerator.

Briefly turn electronic key in steering lock clockwise to the stop and release. The starter will engage until the engine is running.

If engine will not run, and the starting procedure stops, turn electronic key completely to the left and repeat starting the engine.

After several unsuccessful attempts, have the system checked at the nearest authorized Mercedes-Benz Center.

Important!

Due to the installed starter non-repeat feature, the electronic key must be turned completely to the left before attempting to start the engine again.

In areas where temperatures frequently drop below -4°F (-20°C) we recommend that an engine block heater be installed. Your authorized Mercedes-Benz Center will advise you on this subject.

Note:

Too many unsuccessful starting attempts may discharge the battery.

Turning off

Turn the electronic key in the steering lock to position 0 to stop the engine.

The electronic key can only be removed with the selector lever in position "P".

Automatic transmission

The instrument cluster displays the selected gear position. The instrument cluster displays the selected gear position.

- Selector lever position
- Program mode selector
- Accelerator position
- Vehicle speed

The gear shifting process is continuously adapted, dependent on the driving style, the driving situation and the road characteristics.

Important!

When parking the vehicle or before working on the vehicle with the engine running, firmly depress the parking brake pedal and shift the selector lever into "P".
