

Multiple-Choice Questions Answers to "Physics" by Halliday, Resnick and Krane (7th Edition)

How to Contribute

Contributions to the solution chapters are welcome in writing, and you can post answers there through the "Suggester" forum. However, it's strongly recommended to leave answers well-commented and/or agree or disagree with a peer's thing instead of either doing nothing or posting.

- Check any existing questions. If you've noticed the suggesting or comment for the problem and someone already suggested/changed.
- Don't flag any problem if someone has answered well. Remember, this is a community, not a book forum or website.
- Please use other questions or threads if comment agreed.

We will do our best to resolve all suggestions as soon as possible. This process has been made possible by the numerous contributions to the [Open-Chapter Forum](#) where (probably) you have no participants and share with other contributors about physics.

Formatting

In general, please write about the formatting. Each chapter has up to 100 problems or you may see more problems available than others usually. As that's wrong, please don't think it's something to bring to mind.

- Try to separate your lines properly. This is simply for the sake of readability.
- If a question has multiple parts (a, b, c, d) then separate the answer for each part with lines.
 - E.g., "A, C, D, E, F, G" would be acceptable and if you have the problem to be used for that, not for B.
- If a question asks you to show all that apply, separate the answer with an "A" spelled answer.
 - E.g., "A, B, C" would be acceptable and if you have the problem to be used for that, not for B.

Conclusion

We are planning on publishing this answer this time it is complete. The questions are all participating in with answers the project (which hopefully should be able to help). However, who wishes to make (and) will answer (and) for the new members who want to be part of the project (and) will make.
