

ELLIPTICAL

Information and Conditioning

PROPER POSTURE & FORM

- Stand tall with a slight forward lean at the hips (not leaning in a hunched forward position with rounded shoulders and upper back "locking" closed).
- Push your shoulders down and away from your ears. Relax a slight bend at the elbows.
- Hold the handlebars with a light grip and loose elbows. Always keep your feet in contact with the pedals at all times. This is most important with circular feet. Keep your arms straight. Breathe through the nose.
- During both the forward and backward motion, avoid bouncing as this allows you to use gravity to help you move the pedals rather than your muscles resulting in a less effective workout.
- Keep your feet parallel to the edge of the pedal; you can place "heel" boards at the front of the foot, depending on the stride length you prefer. Make sure they are lined up.
