Congress. House. Committee on Appropriations. Subcommittee on Department of Transportation and Related Agencies Appropriations,1994 *Human Error in Aviation* R. Key Dismukes,2017-07-05 Most aviation accidents are attributed to human error pilot error especially Human error also greatly effects productivity and profitability In his overview of this collection of papers the editor points out that these facts are often misinterpreted as evidence of deficiency on the part of operators involved in accidents Human factors research reveals a more accurate and useful perspective The errors made by skilled human operators such as pilots controllers and mechanics are not root causes but symptoms of the way industry operates The papers selected for this volume have strongly influenced modern thinking about why skilled experts make errors and how to make aviation error resilient Human Reliability and Error in Transportation Systems Balbir S. Dhillon,2007-07-11 Each year billions of dollars are being spent to develop manufacture and operate transportation systems

such as aircraft ships trains and motor vehicles throughout the world During their operation thousands of lives are lost annually due to various types accidents Needless to say approximately 70 to 90 percent of transportation crashes are the result of human error to a certain degree Moreover it may be added that human errors contribute significantly to most transportation crashes across all modes of transportation Human Reliability and Error in Transportation Systems is the first book to cover the subject of human reliability across all types of transportation system The material will be accessible to readers with no previous knowledge in the field and is supported with a full explanation of the necessary mathematical concepts together with numerous examples and test problems

Flight Failure Donald J. Porter,2020-05-19 A former aircraft engineer exposes the dangerous breakdown in airline safety due to lapses in maintenance and quality control This book chronicles maintenance related accidents including the recent Boeing 737 MAX accidents caused by individual corporate or governmental negligence and brings the industry s current state of affairs into sharp focus The author a former aviation engineer specializing in aircraft fault diagnosis and maintenance planning examines how failures of the smallest of parts have brought down airliners explaining sometimes esoteric mechanical issues for readers with no technical background Vividly describing the terror of accidents and close calls the author then follows the painstaking investigations to determine causes He focuses on maintenance errors which rank as one of the top three causes of airline accidents and points to the factors that have led to an alarming situation continued reduction of licensed mechanics the shutting down of maintenance bases in the United States and the outsourcing of maintenance to lowballing contractors Outsourcing has forced thousands of licensed mechanics into retirement or different careers For those mechanics still employed in the United States the ever present threat to their jobs does nothing to cultivate loyalty to an employer and devotion to a task The Federal Aviation Administration which should be overseeing quality control is caught in a conflicted dual role charged with regulating safety on the one hand and assuring the fiscal stability of airlines on the other This disturbing wakeup call for improved airline safety standards highlights the critical importance of attention to detail Porter recommends that the numbers and job security of airline mechanics be increased and that they be vested with an authority level akin to medical professionals
