Religion, Science, and Worldview Margaret J. Osler, Paul Lawrence Farber, 2002-08-22 This collection of original essays honors Richard S Westfall a highly influential scholar in the history of the physical sciences and their relations with religion It is divided into three parts the life work and influence of Newton science and religion and historiographical and social studies of science Introductory matter and notes Richard de Bury, 1889 **Reading Practice** Melissa

Reynolds, 2024-08-19 Through portraits of readers and their responses to texts Reading Practice reconstructs the contours of the knowledge economy that shaped medicine and science in early modern England Reading Practice tells the story of how ordinary people grew comfortable learning from commonplace manuscripts and printed books such as almanacs medical recipe collections and herbals From the turn of the fifteenth century to the close of the sixteenth century these were the books English people read when they wanted to attend to their health or understand their place in the universe Before then these works had largely been the purview of those who could read Latin Around 1400 however medical and scientific texts became available in Middle English while manuscripts became less expensive These vernacular manuscripts invited their readers into a very old and learned conversation Hippocrates and Galen weren't distant authorities whose word was law they were trusted guides whose advice could be excerpted rearranged recombined and even altered to suit a manuscript compiler's needs This conversation continued even after the printing press arrived in England in 1476 Printers mined manuscripts for

medical and scientific texts that they would publish throughout the sixteenth century though the pressures of a commercial printing market encouraged printers to package these old texts in new ways Without the weight of authority conditioning their reactions and responses to very old knowledge and with so many editions of practical books to choose from English readers grew into confident critics and purveyors of natural knowledge in their own right Melissa Reynolds reconstructs shifting attitudes toward medicine and science over two centuries of seismic change within English culture attending especially to the effects of the Reformation on attitudes toward nature and the human body Her study shows how readers learned to be discerning and selective consumers of knowledge gradually through everyday interactions with utilitarian books

Javier Fernández-Sebastián, 2024-04-03 This book casts a fresh look at what to date has been a relatively unexplored question the enormous value and usefulness of the metaphor in the understanding and writing of history and at the historical culture reflected by these metaphors Mapping a wide range of tropes present in historiography and public discourse the book identifies some of the key metaphorical resources employed by historians politicians and journalists to represent time history memory the past the present and the future and examines a selection of analytical concepts of a temporal nature built upon unmistakably metaphorical foundations such as modernity event process revolution crisis progress decline or transition The analysis of these and other pillars on which modern history has been built whether as a philosophy of history as an academic

discipline or as a set of events will interest graduates and scholars dealing with the historical and social sciences and the humanities in general Key Metaphors for History offers a broad overview of historiography and historiosophy from an unfrequented point of view halfway between conceptual history theory of history and metaphorology Moreover it constitutes a form of self reflection of the historian on his or her own positionality when researching and writing history **The Prose Brut and Other Late Medieval Chronicles** Jaclyn Rajsic,Erik Kooper,Dominique T. Hoche,2016 Essays on the medieval chronicle tradition shedding light on history writing manuscript studies and the history of the book and the post medieval reception of such texts The histories of chronicles composed in England during the fourteenth and fifteenth centuries and onwards with a focus on texts belonging to or engaging with the Prose Brut tradition are the focus of this volume The contributors examine the composition dissemination and reception of historical texts written in Anglo Norman Latin and English including the Prose Brut chronicle c 1300 and later Castleford s Chronicle c 1327 and Nicholas Trevet s Les Cronicles c 1334 looking at questions of the processes of writing rewriting printing and editing history They cross traditional boundaries of subject and period taking multi disciplinary approaches to their studies in order to underscore the shifting historical social and political contexts in which medieval English chronicles were used and read from the fourteenth century through to the present day As such the volume honours the pioneering work of the late Professor Lister M Matheson whose research in this area demonstrated that a full understanding of medieval historical literature demands attention to both the content of the works in question and to the material circumstances of producing those works JACLYN RAJSIC is a Lecturer in Medieval Literature in the School of English and Drama at Queen Mary University of London ERIK KOOPER taught Old and Middle English at Utrecht University until his retirement in 2007 DOMINIQUE HOICHE Is an Associate Professor at West Liberty University in West Virginia Contributors Elizabeth J Bryan Caroline D Eckhardt A S G Edwards Dan Embree Alexander L Kaufman Edward Donald Kennedy Erik Kooper Julia Marvin William Marx Krista A Murchison Heather Pagan Jaclyn Rajsic Christine M Rose Neil Weijer A Handbook for Travellers in Spain. Language in Life, and a Life in Language: Jacob Mey, a Festschrift Ken Turner, 2012-11-02. This is a collection of invited papers that honours Professor Jacob Mey on the occasion of his eightieth birthday. Professor Mey is and has for a long time been at once one of the most respected, enterprising, industrious, scholarly, and now avuncular members of the numerous linguistics communities in which he has worked. He has made over a distinguished working life significant contributions to all of the sub-disciplines of linguistics from phonetics through phonology, morphology, syntax, semantics, and especially pragmatics. He has sought to make connections between these sub-disciplines and broader areas of thought. These connections have resulted in ground-breaking advances in, for example, Japanese sociolinguistics, pragmatics, and artificial intelligence, Marxist linguistics, pragmatics, and therapy, pragmatics, and machine-processed information, gender and language, literary pragmatics, and societal pragmatics. The collection ends with an in-depth discussion between Professor Mey and one of the editors in which Professor Mey speaks fully and frankly about his life in language and language in life.
