Fake News He Cant Write That English Edition:

Why They Can't Write John Warner, 2020-03-17 An important challenge to what currently masquerades as conventional wisdom regarding the teaching of writing There seems to be widespread agreement that when it comes to the writing skills of college students we are in the midst of a crisis In *Why They Can't Write* John Warner who taught writing at the college level for two decades argues that the problem isn't caused by a lack of rigor or smartphones or some generational character defect Instead he asserts we're teaching writing wrong Warner blames this on decades of educational reform rooted in standardization assessments and accountability We have done no more Warner argues than conditioned students to perform writing related simulations which pass temporary muster but do little to help students develop their writing abilities This style of teaching has made students passive and disengaged Worse yet it hasn't prepared them for writing in the college classroom Rather than making choices and thinking critically as writers must undergraduates simply follow the rules such as the five paragraph essay designed to help them pass these high stakes assessments In *Why They Can't Write* Warner has crafted both a diagnosis for what ails us and a blueprint for fixing a broken system Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education this book challenges readers to develop the skills attitudes knowledge and habits of mind of strong writers **Who Wrote This?** Naomi S.

Baron, 2023-09-12 Would you read this book if a computer wrote it Would you even know And why would it matter Today's eerily impressive artificial intelligence writing tools present us with a crucial challenge As writers do we unthinkingly adopt AI's time saving advantages or do we stop to weigh what we gain and lose when heeding its siren call To understand how AI is redefining what it means to write and think linguist and educator Naomi S Baron leads us on a journey connecting the dots between human literacy and today's technology From nineteenth century lessons in composition to mathematician Alan Turing's work creating a machine for deciphering war time messages to contemporary engines like ChatGPT Baron gives readers a spirited overview of the emergence of both literacy and AI and a glimpse of their possible future As the technology becomes increasingly sophisticated and fluent it's tempting to take the easy way out and let AI do the work for us Baron cautions that such efficiency isn't always in our interest As AI plies us with suggestions or full blown text we risk losing not just our technical skills but the power of writing as a springboard for personal reflection and unique expression Funny informed and conversational *Who Wrote This* urges us as individuals and as communities to make conscious choices about the extent to which we collaborate with AI The technology is here to stay Baron shows us how to work with AI and how to spot where it risks diminishing the valuable cognitive and social benefits of being literate **Robert's Rules of Writing,**

empirically tests compares and explains the effects of British and American legacy conservative press and far right websites on accordant political views and behavioural intentions Correspondingly the 2016 Brexit Referendum and American Presidential election results are often attributed to the spread of fake news through social media Russian Bots and alt right news websites This has raised concerns about the impact of digital disinformation on democracy as well as the rise of nativist parties and movements worldwide However this book argues that these causal attributions are largely based on unproven assumptions and deflect attention from the more influential and harmful role of traditional conservative media To support this argument Leyva incorporates insights from various fields such as neurocognitive science media communication research cross cultural psychology and sociology Additionally the book presents primary evidence from a series of experiments that examined the effects of candidate related fake news and immigration coverage from both old and new media right wing sources These experiments focused on how such content influences anti immigrant attitudes and voter preferences By doing so the book provides a nuanced and robustly tested theoretical account of how right wing media affects political beliefs sentiments and practices at the neuronal level and of how this can in turn negatively impact democratic multicultural societies Given its interdisciplinary approach this book will be of interest to scholars in the social behavioural and cognitive sciences who are studying media psychology online misinformation authoritarian populism political sociology new media and journalism
