

Renewable Natural Gas Tariff Provisions in FERC Regulated Pipelines (cont.)

Pipeline Operator	Date Enacted/ Proposed/ Withdrawn	FERC Docket No.	Brief Description	Tariff Sections Impacted	Interconnecting Pipeline Systems	Notes/Comments
SPR Gas Company	03/14/2021	PR13-14-000	Revised Statement of Operating Conditions to update its rates for interstate transportation service to reflect newly effective rates for comparable interstate service. In its request, SPR Gas provided marketing and administrative costs, RNG and carbon offset costs, and projected premium collections for the time period of 2020 through 2023, though they do not expect the program to be cost neutral until after 2023.	SPR Gas Company, FERC Gas Tariffs, Operating Conditions, Statement of Operating Conditions (S.O.C.)	Several major interstate pipelines, including AEP Pipeline, Great Lakes Gas Transmission, Northern Natural Gas, and Vector Pipeline	FERC staff agreed that pilot program was designed to meet the preferences of current customers regarding an affordable renewable gas program that also allows producers from their own natural gas storage.
Great Basin Gas Transmission Co. (GBG) (Rocky Mountain Pipeline)	03/18/2022	RP13-43-001	Revised tariff to enable Great Basin to accept RNG into its pipeline system at "RNG Receipt Points" and propose and enable the development of RNG in Great Basin's market area while protecting the integrity of Great Basin's system, gas-burning equipment of its customers, and general public. RNG must conform to the gas quality specifications of traditional gas sources and gas quality specifications for processed biogas, with rights to accept RNG containing not more than 4% by volume of inert substance level and a total gross heating value of not less than 900 Btu, as long as the RNG meets the other requirements in Great Basin's Biomethane Verification Program and Operating Policy.	GPC 1, Definitions (Sheet Nos. 70, 71, 72, 73, 74, 76) GPC 3, Quality (Sheet Nos. 75, 76, 87, 88, 89, 90) GPC 16, RNG/RNG Standards (Sheet Nos. 218, 219)	Northwest Pipeline LLC, Rocky Mountain LLC, and Tuscarora Gas Transmission Company	Tariff language identifies the maximum levels for health-related and pipeline integrity constituents of concern for RNG delivered to an RNG Receipt Point of Great Basin's system. A testing requirement for RNG is also included in the Tariff. Great Basin made a similar filing in RP11-067 to modify Gas Quality specifications.
Kans River Gas Transmission	N/A	N/A	Kans River has an Operating Policy on Biomethane Receipts setting forth the requirements for biomethane at the system, including testing requirements before biomethane can be received and sets forth limits on constituent levels that would render the gas unmarketable.			The Kans River policy is vulnerable to dispute or other third-party complaint. It contains language in the form of a policy that other operators have been ordered to include in their FERC-regulated tariffs. FERC would not consider the policy to be enforceable because it is not contained in the tariff.
