

FINDING WATER

In the desert, you can lose up to one litre of water in sweat every hour. Don't stay thirsty. Try and drink regularly in small quantities to avoid dehydration.

Signs of water

- █ Flocks of birds often circle over waterholes.
- █ Sound carries over a great distance in the desert. So even if you can't see them, listen for the chirping of birds to locate activity.
- █ Most animals return to a water source often. It's probably a good idea to follow their tracks.

Build a solar still to get water

- █ Dig a hole 3 feet across and about 2 feet deep.
- █ Make a smaller hole in the middle of it and put in a container (such as a plastic bag) to collect the condensed water.
- █ Cover the big hole with a sheet and place a rock in its centre to make it curve down.
- █ The condensation will collect as water in your plastic bag.

Don't stay out for too long without drinking water.
Being thirsty means you're already in a state of dehydration.

FACTS ABOUT FOOD

On average, a woman needs 2,000 calories a day and a man needs 2,500. The organs use about 70% of these just to function. That means even if you sleep all day, you'll still need around 1,700 calories.

Your body uses water to break down food into nutrients. That's why you always feel thirsty while you're eating.

Bad food makes you even thirstier. As your blood becomes saltier, it pulls water out of your cells which fight back by sending a distress signal to your brain.

You can survive for a long period without food but it's no picnic. A quick look at what to expect:

- █ Day 2: Lethargy and loss of concentration.
- █ Day 4: Heightened irritability.
- █ Week 1: Beginning of depression.
- █ Week 2: Severe mood swings and erratic behaviour.
- █ Week 3: Prepare for hallucinations.

Without water, you probably won't live 10 days.

how art food and creative thinking can prepare us for future catastrophes This cookbook of ideas rethinks our eating habits and traditions challenges our food taboos and proposes new recipes for humanity's survival These more than sixty projects propose new ways to think and make food offering tools for creative action rather than traditional recipes They imagine modifying the human body to digest cellulose turning plastic into food tasting smog extracting spices and medicines from sewage and growing meat in the lab They investigate provocative possibilities What if we made cheese using human bacteria enabled human photosynthesis through symbiosis with algae and brought back extinct species in order to eat them The projects are diverse in their creative approaches and their agendas multilayered multifaceted hybrid and cross pollinated The Anthropocene Cookbook offers a survival guide for a future gone rogue a road map to our edible futures *The Survival Guide to Journalism* Dan Synge, 2010-06-16 This is brilliant A must read for anyone thinking about going into journalism or already there The recurring Q A style is really helpful the author really did pre-empt all my various questions As someone who is deciding whether to go into journalism or not this is the only book I have come across so far which has actually been helpful and fun to read at the same time What I liked best is that the book is fun without being patronising a lot of journal books are stuffy outdated or intimidating Importantly it tackles all the current issues about journalism becoming multi platform with advice on blogging etc And although encouraging it is realistic enough to make sure you don't see journalism through rose tinted glasses it really made me think hard about whether I would survive as a journalist I would definitely recommend this to anyone thinking of starting out or starting out in journalism it's essentially a journalism course in a nutshell Katherine Lough The best bit about this book as opposed to others about journalism of which there are many is that it is written in a friendly and non intimidating style As a journalism student I have spent many hours poring over books that judge me for wanting to write about the soft stuff whereas Synge actually gives tips on how to break into celebrity gossip or arts reviewing The advice sections from real working journalists in different sectors and publications are really helpful as they give a realistic insight into the profession and hold up all the best bits while conveying the disadvantages to life as a scribe Synge's tips and hints are relevant especially the bits about online journalism and how journalists have to be multi skilled today What I found most interesting was the chapters on freelancing Overall I would recommend this book to anyone hoping to be a journalist studying to be a journalist or working as a journalist H Stuart This essential survival manual to print and online media journalism explores the personal qualities and skills needed to break into this exciting but often uncertain field It considers the current state of expanding media routes into the industry and the pros and cons of being a staff journalist or freelance Helpful coverage includes Practical hands on advice on news and feature writing plus specialist areas such as profile writing reviewing and blogging Useful tips and advice from top working professionals Up to date information on where the best opportunities are Exercises easy to follow checklists and short Q A sessions The author draws on his own extensive experience in the field and suggests useful links to organisations that specialise in helping aspiring journalists to
