The Wetlands Handbook, 2 Volume Set Edward Maltby, Tom Barker, 2009-07-23
Forty two chapters by international experts from a wide range of disciplines make The Wetlands Handbook the essential tool for those seeking comprehensive understanding of the subject. A departure from more traditional treatises, this text examines freshwater wetland ecosystem science from the fundamentals to issues of management and policy. Introductory chapters address the scope and significance of wetlands globally for communities, culture and biodiversity. Subsequent sections deal with processes underpinning wetland functioning, how wetlands work, their uses and values for humans and nature, their sensitivity to external impacts and how they may be restored. The text is illustrated by numerous examples emphasising functional and holistic approaches to wetland management, including case studies on the wise use and rehabilitation of wetlands in farmed, urban, industrial and other damaged environments, highlighting the long term benefits of multiple use. The Wetlands Handbook will provide an invaluable reference for researchers, managers, policy makers and students of wetland sciences.

Historic Landscapes of Britain from the Air Robin Edgar Glasscock, 1992-10-29

The Fayum Landscape Claire J. Malleson, 2019-04-19
Located some one hundred kilometers southwest of Cairo, the Fayum region has long been regarded as unique, often described in terms that conjure up images of an idealized Garden of Eden. In *An Egyptian Landscape*, Claire Malleson takes a novel approach to the study of the region by exploring the ways in which people have, through millennia, perceived and engaged with the Fayum landscape. Distinguishing between the experienced landscape of state and bureaucratic record and the imagined landscape of myth, meaning and observers' personal influences and expectations, Malleson questions in detail where those perceptions come from. She traces religious practices, follows the tracks of myths and traditions and investigates the roots of stories found in texts from the pharaonic, classical and Medieval Islamic periods. She also reviews many more recent

travel writings on the region from the seventeenth to the nineteenth centuries The work of each author is presented in its historical and cultural context and Malleson integrates what is known about ancient activities in the Fayum based on the archaeological evidence from the many monuments and ancient settlements that exist in the region Scholars and students of archaeology and landscape studies as well as general readers interested in Egypt's history and archaeology will find this book highly engaging and enlightening **Landscape History**, 2003 **Wessex: A Landscape History** Hadrian
