Press Freedom and Regulation in a Digital Era Irini Katsirea,2024-04-22 The processes of convergence and digitalization have altered the technological conditions in which the press operates More than that they have altered the environment in which the press stakes its claim to freedom and strives to protect its turf from

other media players The advent of internet based services and applications has blurred the technological boundaries between the press broadcasting and telecommunications challenging their regulatory silos Press Freedom and Regulation in a Digital Era A Comparative Study assesses the extent to which the emergent regulatory model for online news media is shaped by analogies from the past or rather by a newly prevalent culture of control By interweaving two distinct strands of analysis the concepts of press freedom and regulation and the phenomena of convergence and digitalization this book examines the key implications of digitalization and assesses the challenges for press freedom in the nascent digital news ecosystem Drawing upon decisions of the European Court of Human Rights ECtHR the Court of Justice of the European Union CJEU as well as from cases in Germany the United Kingdom and the United States this comparative work comprehensively explores the regulation of the press in the digital era and the impact of the proliferating media laws policies and jurisprudence on press freedom Irini Katsirea identifies the regulatory ruptures that persist and makes concrete and timely recommendations for the evolving online news ecosystem

Big Data Platforms and Applications Florin Pop, Gabriel Neagu, 2021-09-28 This book provides a review of advanced topics relating to the theory research analysis and implementation in the context of big data platforms and their applications with a focus on methods techniques and performance evaluation The explosive growth in the volume speed and variety of data being produced every day requires a continuous increase in the processing speeds of servers and of entire network infrastructures as well as new resource management models This poses significant challenges and provides striking development opportunities for data intensive and high performance computing i e how to efficiently turn extremely large datasets into valuable information and meaningful knowledge The task of context data management is further complicated by the variety of sources such data derives from resulting in different data formats with varying storage transformation delivery and archiving requirements At the same time rapid responses are needed for real time applications With the emergence of cloud infrastructures achieving highly scalable data management in such contexts is a critical problem as the overall application performance is highly dependent on the properties of the data management service
