*Federal Register* ,1988     Artificial Intelligence and Integrated Intelligent Information Systems Xuan F. Zha,2007-01-01  
Researchers in the evolving fields of artificial intelligence and information systems are constantly presented with new challenges Artificial Intelligence and Integrated Intelligent Information Systems Emerging Technologies and Applications provides both researchers and professionals with the latest knowledge applied to customized logic systems agent based approaches to modeling and human based models Artificial Intelligence and Integrated Intelligent Information Systems Emerging Technologies and Applications presents the recent advances in multi mobile agent systems the product development process fuzzy logic systems neural networks and ambient intelligent environments among many other innovations in this exciting field     *Decentralized Neural Control: Application to Robotics* Ramon Garcia-Hernandez,Michel Lopez-Franco,Edgar N. Sanchez,Alma y. Alanis,Jose A. Ruz-Hernandez,2017-02-05 This book provides a decentralized approach for the identification and control of robotics systems It also presents recent research in decentralized neural control and includes applications to robotics Decentralized control is free from difficulties due to complexity in design debugging data gathering and storage requirements making it preferable for interconnected systems Furthermore as opposed to the centralized approach it can be implemented with parallel processors This approach deals with four decentralized control schemes which are able to identify the robot dynamics The training of each neural network is performed on line using an extended Kalman filter EKF The first indirect decentralized control scheme applies the discrete time block control approach to formulate a nonlinear sliding manifold The second direct decentralized neural control scheme is based on the backstepping technique approximated by a high order neural network The third control scheme applies a decentralized neural inverse optimal control for stabilization The fourth decentralized neural inverse optimal control is designed for trajectory tracking This comprehensive work on decentralized control of robot manipulators and mobile robots is intended for professors students and professionals wanting to understand and apply advanced knowledge in their field of work     *Pressurized Water Reactors* Yurugi Kanzaki,Hidehito Mimaki,Tomofumi Yamamoto,2024-07-08 Pressurized Water Reactors Volume Three in the JSME Series on Thermal and Nuclear Power Generation compiles the latest research on Pressurized Water Reactors PWRs into a very comprehensive reference beginning with its history The reader is then guided through optimum design processes for PWRs considering safety throughout The authors then discuss thermal hydraulic aspects within the PWR system and inside the reactor core making this a valuable resource for nuclear and thermal engineers and researchers Combining their wealth of experience the book presents in depth knowledge on the advancement and improvement of fuel rods that is gleaned from decades of experience and lessons learned The inclusion of analysis codes for the design and safety elements ensure makes this a unique reference which will provide the reader with a solid

understanding which they can transfer to their own professional and research settings Future prospects for next generation PWR and Small Modular Reactors are also discussed giving the reader a basis for further research of their own Contains contributions from the leaders and pioneers in nuclear research at the Japanese Society of Mechanical Engineers and draws upon their combined wealth of knowledge and experience Includes analysis codes such as RELAP5 for the design and safety improvement of pressurized water reactors PWRs Presents history examples and case studies from Japan and other key regions such as the United States and Europe **Technical Review** Shin Mitsubishi Jūkōgyō Kabushiki Kaisha,1992
